 blink, wheels spin, but no POST screen, no Windoze, nada...
Power down, power up again, and up she wakes, at least so far...

It's an Ancient Abit mobo from the Flintstone days (slate based, I
think, sturdy but inflexible)...

Anyway -- ain't there some kind of battery lurking on that board
somewhere? Could that thing have bonked (what a surprise, right?)?

Thing is -- this box just keeps on ticking, and mostly all I've done
with this over the last five years is record and mix and record and
mix etc. Would hate to junk it over some minor issue like what day
it is...

-- wisdom welcome as always -- thanks -- Chas.HI Chas,

Things that I would think of first off as possibly being the problem.

1.BIOS battery is dieing or dead.

2. Dire power supply

3. dieing motherboard

the top 2 will be easy to deal with and you would have to do them first
before you know if #3 is whats happening.

Chris

I like to try to make DAWs perform unnatural acts. :o)

I'll keep everyone posted if I can find a way to get this happening. Dave

(EK) had some suggestions yesterday that I'm going to try.

Cheers,

Deej

>Imho.. :) Pro Tools Sounds the best, and works for pretty much for all Genres
fo music and it's mixer is very flexible.

Now, Cubase's editing,workflow, and sound quality makes it a formidiable
weapon, as well as it's price.

For me, SX & Neundo cannot handle the mid to big mixes (40 Plus) with plug-ins,
mixng agressivley. The summing bus (to me) seems to breakdown when.
If you mix safe(staying in the -4 -6 db)ranges on your channels, then SX/neundo
will be fine.

Pro Tools Le/M-Powered-Has that nice, vry true top end sound that's heard
on many records. Sufiice it to, it's very easy to mix on PT (LE/M_)..
