The problems this addresses were really bothering me.

I locked the Scherzo to one CPU, and I was still having command queue errors
when PARIS was not locked also. I haven't had any problems at all with this
build.

Next stop, Scherzo.

:)

>Hi Dimitrios,

Thanks for the update. I've been thinking a lot about that. Would you mind
runnign a debuuger and sending me the output? I'll post debugview when I
get home if that works for you.

Just to confirm:

Submix 5 doesn't play. If you solo Submix 5 it plays. If you then unsolo
it it continues to play.

Thanks!

Mike

what you need. I picked one up a couple years ago to pack on my goldwing for
trips.
I didn't want to pack one of the fluke meters.
at least you will get a reading instead of guessing what LED brightness is

zero.

Hey guys and gals, just wanted to share that I will be doing a Christmas tour
with Will Downing, Gerald Albright and Lala Hathaway. Here's the flyer...dates
are being added. I'll try to keep you posted.

Be well..
