Jeff,
Thanks! A step by step would be great since I've only done this a few =
times
with varying results. Sometimes it works and sometimes it doesn't.

Tom,

Crosover cable should be fine. Just make sure on each computer you=20
force the configuration rather than let it "auto detect". You'll find =

this by going to the network control panel. If you're using IP, =
you'll=20
have to manually set the ip address and make sure they're on the same=20
subnet.

Let me know if you need a specific example.

How =
does=20
the receiving computer's audio application know how to
break up =
the data=20
stream? For example, let's say you're sending
24 channels of =
audio=20
through your LAN card & cables from computer "A" to
computer =
"B"...=20
how do you assign where the
various channels are going once it =
gets to=20
computer "B"?

This is =
interesting.

We actually did create Hussein, but I refering to the "real" problem right
at this vary moment, which is more about Iraqies killing Iraqies, than about
them not wanting us there. They want us out, so the real slughter can begin.
Sorry, I was affraid I didn't make that vary clear.
