I was hoping to buy one from Brad's pile, but never got a reply from
him either via email or the group.

So, I have a concert at the theatre on April 15th. I need more
channels - I need another 8in card.

Please let me know.

Or, alternatively, if you have one you could lend me for a couple of
weeks, and then I'll look to buy one later...

HELP!!!

Well, I'm not claiming that ANY business is more altruistic than not. I
don't think that's really the issue. Corporations have a fiduciary
responsibility to make money for the stockholders.

However, some businesses are more visionary than others, and that distinction is important to me. Even when it's not nearly on the level of the best charitable organizations.

How our culture develops is important, and many businesses are involved in that. Some do better than others. In this case, Apple gets my vote big time over Microsoft. So I will agree with some of Jame's points on that one (with no hyperbole from me, just observing what they've accomplished, for example with the record companies and with electronic distribution of independent music).

Which doesn't mean I won't criticize Apple when they screw up, which they do from time to time (I can give you examples).

And just because I respect many of Apple's accomplishments of late, doesn't mean I will blindly buy every toy from Apple if I don't think I need it. For example, I don't own an iPod. But I do use iTunes.

See, I'm not going that far. That's really getting into straw man territory.

Long week this week? I dunno about you, but I'm really glad to see the weekend, and no gigs for once. That means I get to relax (er, clean the garage, dang!).

Cheers,

Hi,<=
BR>I am=20
  glad there are 5-6 Paris users willing to test and work along with=20
  senderella
and Paris and as a matter of fact with making Paris a =
better=20
  daw...
I wish though that all yiou Paris users and posters here =

would jump=20
on because
this would make things better for all of us...

So =

Senderella really works great !

FIRST OF ALL you have to put a =
line in=20
your Paris cfg :
EDSTransfer=3D8,8
Then...
1) If you work =
16bit file=20
you need a 16bit empty track , you can make this
just by recording =
nothing=20
for say 6 minutes and then name it 16bit_emptyfile.
If you w
