Also, just because I recognize there is a real, and likely threat of more attacks here in the US, doesn't mean I'm an "overcompensating insecure spendthrift fool undercutting our own democracy with shifty eyed abject fear". I do understand though that this isn't some war between two countries, where we can "negotiate" an end to hostilities, or simply drop our support for Israel, or change our policy and make everything better. Whether it was decades of failed U.S. policy or not, these people want us dead right now, and we have to be proactive. Once we do something significant about our borders and make sure we have the absolute best intelligence, defense, and law enforcement agencies money can buy, then we can talk about long term programs to make everyone "like us". Sorry, gotta go. It's lower body workout day. I have to be in shape for all that "knee jerking"! ;>)

Crossover cable should be fine. Just make sure on each computer you force the configuration rather than let it "auto detect". You'll find this by going to the network control panel. If you're using IP, you'll have to manually set the ip address and make sure they're on the same subnet.

Let me know if you need a specific example.

Jeff

> ganttHey Tony,

I never said anything about "a few wacky terrorists."

I was speaking of the wacky beliefs of a few terrorists, a very
different concept.

If we act in our best interest and the leadership of al-Qaeda happens
think we're being "weak" in so doing, it would be stupid for us to be
thusly manipulated to act to our detriment just to impress those few
terrorists.

We should act out of strength of purpose, clear vision and as much
wisdom as we can gather, being true to our ideals, regardless of the
wacky beliefs of a few terrorists.

More than one expert on the region has criticized our lack of long term
preplanning in Iraq before going in. We're now in a situation that the
current (for the moment) policy architects did not anticipate nor
prepare for, and it's not a great situation. Many lives lost and \$300
billion tax dollars later, more lives and dollars every day, significant
tax money unaccounted for, Iran gaining influence in Iraq, these sorts
of consequences have been a significant factor in this election. Voters
are asking hard questions, as well they should.

Our various policies directly affect the region and so we must carefully
consider their effect. We will never have perfect intelligence systems,
a perfectly impenetrable border, flawless law enforcement and a blanket
defense against everything nor can we afford that. We can work in that
direction within what we can afford but we must also work in other
directions to help create peace. There is a balance. Anyone who preaches
that there is only ONE avenue of action is probably making money on that
avenue or listening to someone who does.

Yes you can recognize the possibility of additional attacks on the US

without subscribing to the notion that we have to behave shortsightedly and predictably in order to impress a few terrorists with our "non-weakness."

Consider that that kind of stubbornness and inability to see creative solutions can actually ma

you want to export. Solo the track. Open the main mixer (or hit
"ctrl" and "+/=" keys for shortcut, if I remember correctly) and
choose "export audio"... Then you get a dialogue to define parameters
(stereo/mono, name, etc.) and specify location to write the file,
whether or not to export with effects in place, etc. Hit "enter" and
you're done...

For positioning: set that left locator at a specific bar line (if your
target project is locked to BPM) or at a specific time... Drag into
Paris (or whatever host you're aiming for) and lock to whichever
reference you chose for export -- should be dead on the money... And
leave that right locator loose enough to allow for any reverb/echo
tails...

-- now go forth and make n
