Do I need this version? I guess if you finally settle on a version I should
go with that, but with a rock-solid system right now, do I need to follow

along? I am willing to help beta test if you need, as it's not any real trouble at all. I am at your service if needed.

Jimmy

>MikeI just now, for the first time since using Paris, started getting the mistimed rendered file thing. The one where there's lots of little edits and cross-fades and when you render the track some of the audio data is out of time? Bummer, dude. Is there a known work-around? Or is this all Mike's fault with his damn software tweaking? ;)

I'll check around the known bug list when I get back from our journey into town.

JimmySorry for putting this here, I just thought there was a better chance of it
being seen and I want it for a Christmas present for my son so time is important.
 Thanks Jimthat's always caused by edits and crosfades that don't touch.
I bet if you undo the render and zoom in all the way to check the edits,
you'll find one, or some that are totally touching.
That's always been the case for me.

Someone said that "We've seen the enemy, and he is us."

I'm pretty sure I found the cause of the buffer allocation errors. When
I was working on the PSCL, I increased some buffers as part of my trying
to figure out why the app was locking up on a multi cpu machine. I increased
them a lot and never turned them back down. Sorry. :(

I recompiled the PSCL with the original buffer settings, which I think will
solve this once and for all.

Thanks everyone who tests these betas. I'm running the latest builds right
now, and all seems well.

Cheers!

Mike
