>JeffEBay is going to ding me for 6% to sell these so I figure I'll make these
available here one last time at lower prices before they go on the block.

Matched pair of Neumann KM184's. Minty fresh. Black finish. I've owned these
since 1998. They are wonderful.....they are also redundant here now and need
a good home. They come in the original cherrywood Neumann logo'ed box with
windscreens and the original clips. - \$1100.00

2 x Claytorbuilt Mojave MA200 precursors. See previous post from a few days
ago for description-\$400.00 each

2 x AKG C460B/CK61 SDC's. come with cases and mic clips.-\$300.00 each

Matched pair of Rode NT5's in flight case with all the factory
goodies-\$250.00

Studio Projects C-1 - comes in flight case with shock mount=\$125.00 "mint
condition"

Studio Projects C-1-no case or shock mount-\$90.00 "mint condition"

Sony MU-R201 true stereo reverb/delay/FX \$100.00

Get e'm while they're still gettable.....

;o)Dang!!!!.....sorry.....wrong forum.....ignore the previous post and fo
to the FS site

;o)Paul ,

That's the ticket! THanks a bunch.

Jeff

pany !Please send me your green light when you're done please and congrats
!http://www.yamahasynth.com/products/n8n12/index.html

When I heard Yammy married Steiny, I was hoping for some products that really integrated Cubase and a mixer/controller. This may be what I was hoping for. I hope it really has quality sound.

It's available in Britain but not yet the US. GBP899.00 = U\$1,782.18HI Bill, Yes they do look promising. Hopefully the analog end sounds good. They definitely seems to have paid more attention to feature for the home studio market. It actually seem to have a more outputs on it which is a big sore point withe the Mackie Onyx and all the clones of it. Looks like a hybrid between the O1x and O1v but I sure hope it isn't still using M-Lan. That could be its Achilles heel.

I didnt know that behringer used kids to manufacture.

I am starting my boycott immediately.

I saw a PBS special on bluejean manufactures in asia.

Poor kids there. Abused in these factories.

Not paid...etc...

We couldn't make out the name brands on the jeans otherwise we would =
have boycotted them.

Makes me sick what these greedy SOBs will do for a buck.

They must be decendants of that large tribe from Apocolypto.

Who was that the Maiyans or Incans or something?

 IDLE, not doing anything, with no
 applications running, the OS reports using half a gig or RAM. That's not
 a problem in the sense that memory is cheap, but it's offensive to my computing
 sensibilities. Presumably all of those processes that are making sure you
 can't listen to your own music or install a driver take up that memory.

It's also just butt ugly.

> (859) 635-5762 Kinda OT, kinda not... Your report of Vista is consistent with others I've heard... which makes me wonder why dedicated recording HD systems are not more prevalent...

Even though it took 3 years to release after it was announced, I am DYING to fully demo the Tascam X48... supposedly runs VSTs, DX, etc... and does not rely on XP, Vista, anything...

FWIW: Radar (my favorite recording machine beyond ANY doubt) runs off BeOS... and (get this!) the lowly Reaper DAW can import, manipulate, and export tracks IN RADAR'S FORMAT!!! No format conversion necessary - all digital, still played back thru Radar's DA as you wish...

To my thinking, this is HUGE... forward thinking at its finest, incorporating a nearly free application with THE gold standard of ADDA and recording...

If only Samplitude would follow suit... but I digress... the X48 may have some quirks yet to be worked out, but it does look very promising for those of us who really do NOT want to hassle with standard Windows/Vista/OSX issues...

alted technology evolves, so they get left behind. Or,
I guess they COULD, if they were able to garner enough market
share to be profitable, and hence make it possible for the
company to put money back into R&D.

They're also usually not as versatile, and there are always
compatibility issues if you have work that goes back & forth
between other studios.

I mean, think about it - how many pro-level dedicated digital
platforms have survived in a healthy way for very long?

Neill think there are lots of compelling reasons to use a computer for recording,
I just don't think there's ANYTHING compelling about Vista.
