Thanks=20
EK, I know about all of that but I was talking about when you =
select
a=20
whole tracks fader automation and want to put it up say .2 db =
sometimes
it=20
will only go up .5 or so. The shift drag thinkg does not seem to =
work
for=20
me at least.

.</DIV>Editing=20

automation is easy. It's also in the manual. Basically you =

turn on the display data buttons for either volume, pan or mute =
and then=20

turn on the edit data button for the same. Then you pick the =
tool at=20

the top to select, move, draw lines, freeform draw, erase. =
You can=20
use
interpolate or simplify to add more values or reduce the =
number of=20

values easily. Reply if this doesn't make sense. 10 =
minutes in=20
the
manual and you'll have it. I'll repost my automation =
notes soon=20
for
recording automation cuz the ones on my site are wrong at the =
last=20
step.
