-----=_NextPart_000_000C_01C710E0.405FFE20--Chris,
I took a couple of CD's to the local video store some months back. They
were pretty dinged up and the store had a disk washer thingy. Both disks
came out looking alot better, and while before I was having some glitches on
playback, afterwards they were gone.
Hope that helps,
MR

>>OK my questions continue. I created a vst folder and put it in c programs
blah blah. I set PARIS"S vst file path and the effects are showing up. the
one I am working with is tube amp, here's my question. Where do I put the
presets. How do I make them show up. ThanksYou can use a form for PartitionMagic programs
to partion the disk in up to
4 partitions without losing any data. I know Symantec, Acronis and VCOM are
selling these kind of things.

Not Paris related, but I can find nothing on the internet and thought maybe someone in this group could help out.

I've got a client whose trying to convert .wma files to .wav files and then burn CD's with the .wav files. Her operating system is OS X 10.3. There are solutions out there, but they seem to all require OS X 10.4 or greater. Toast might help, but I seem to need version 6.0, not the latest, and I'm unsure if it converts .wma to wav, though it clearly will burn CD's.

Thanks gents.
