She was working flawlessly when I retired her.

You can hear her work here:

<http://www.ringwormindustries.com/audio.htm>

Thanks!

How about 500 + shipping? Sorry. Done deal. Good luck... Anyone have a copy to sell or let go. I have 3.0 for mac and the original 2.1 version for mac/ windows. I paid full retail for the 3.0 version but I believe it was a download and never got the windows version.

I emailed ID but haven't got a response yet as far as switching platforms from mac to windows if they will still honor my original purchase.

I want to be legal on this.

Thanks

Kurt Gregory

Hi Kurt - it stands to reason that if it's legal for you to sell your copy of 3.0 to another person and transfer the license, there could be no rational objection to you simply transferring it to yourself across platforms.

Give ID a little longer and then give 'em a friendly prod, I'm sure they'll sort you out. Yes, I agree on that. I found the windows 3.0 download at paris FAQ link. That's what I needed. I'll transfer license or whatever I need with ID when I get it up and running.

Thanks A friend of mine has given me some Paris hardware items for sale on eBay. I thought I'd post here first.

There is:

2 Control 16 fader units

2 MEC

2 ADAT Sync cards (SOLD)

1 Video Sync card.

A bunch of cables. (sorry for lack of detail. Don't know much about Paris systems)

I can post pictures later. (I just now joined the forum).

Not sure what price to sell yet or whether to sell each item separately.

I'll be putting whatever is unsold up on eBay in early May.
