nk">1@linux">news:471b6eb0$1@linux</A>...</DIV>
Hi=20
Tom,

Are you using a default project with PARIS? I'm so =
sorry of=20
this has been
asked and answered already. If so, perhaps it =
is=20
telling card zero to lock
to an external clock, which it can't =
because=20
there isn't one.

It would be interesting to attach an external =
clock=20
source to the MEC and
then start PARIS to see how it behaves. =
Or, if=20
the clock generator is fried,
tell paris to lock externally and see =
what=20
happens when an exteral clock
source is applied.

Isn't there =
a=20
master house synch switch in the cfg file? I've never =
used
it. =20
Maybe DJ could help with what that should/shouldn't be set =
to.

Wish I=20
could do more than think out loud...

Mike

"Tom Bruhl" =
