Hi Dimitrios,

I have tried on at least four occasions to get this plug
doing what is supposed to do with no success.

It installs, I wrap it with fxPansion 3.3, it shows up as an insert,
I insert it on all tracks, I adjust the latency settings to hear
audio move in time but nothing moves.

Is it not supposed to be wrapped? What else is there?

I installed it, uninstalled it, then reinstalled to see if that was the =
problem=20
but that was no fix.

Tom

I never had this problem with the G450 cards. If you want to upgrade to a different dual head card, I recommend the NVidi G\$EForce 5500's. they worked great for me with Paris on an ASUS A7V mobo (VIA chipset).I tried to go back. For some reason my UAD-1 cards won't let me. UA tech support has been no help. They no longer support OS 9.

TCBlT's hot news !! was just pondering renaming the groups. We seem to have two active groups now, so I was thinking...

(*) Rename the main group to Music Technology - EMUEnsoniqPARIS

(*) Rename the "General" group to "Paris Social Club - EMUEnsoniqPARIS"

....or something like that.

Or not. What do you guys think? Might help ensure that we stay on music stuff on the main group, as well as encourage some more general social chit chat on the other group.

That was my thinki

Cheers,
Kim.Hi Rod,
I think the G450 issues might have been specific to certain combination of hardware not just being a G450 card.

So it's a Mac post and it's not music related even though SoundTrack is part of FCP and several users here use FCP. Of course the usual smart asses come out and run their mouths, and now we need to change the whole news group?

What was that ridiculer, being ridiculed thing?

Ok guys

procreative/news/index.cfm?newsid= 21188The average daily posts now have to be down below 20. The only reason I still look at the page is that I have it set up as a sort of RSS feed at work so I can respond really easily. I can just delete it and leave y'all alone as I'm not likely to EVER say anything on topic save the odd computer fix that Chris Ludwig probably can do better than I can.
