I am unfamiliar with the way Reaper works and from what I am reading so far, it sounds interesting. I just hope it isn't something that is so deep and embedded and bloated that it takes a gyro-symmetric engineer to figure out just how to do some things. I have a small setup with an Alesis io14 and used Sonar. Some things are not that easy to figure out.

Anyways... I seen this mentioned before in the thread and it confuses me.

Is it a typo or could explain what you mean by, "The Presonus does not work right with Presonus gear". Wha

t Presonus won't work right with the Presonus gear? Does Presonus have a recording software that comes with their gear... and you are saying that software doesn't work with that gear? I am unfamiliar with Presonus and was just wondering what you all meant by that. Sounds like I will stay from Presonus, if that is the case...
