Witch hardware and witch midi interface?
I am really having problems getting my midi stuff synchronized to paris.

Cheers,

DennisI have been running Paris 2.1 on 98SE for 8 yrs now with very few problems, many CD projects finished and put to bed with very few embarassing moments ! ...Guess I'm just lucky ! But lately, an annoying thing turns up...if I have " Plate Reverb " selected on, for instance, aux send 1, and everything is O.K. for a few mix takes, one time I will open up the project and the reverb is maxed out.....CAVE CITY !! I can choose "no effect " and turn off any aux send, but the reverb is still huge....so far re-boot is the best solution, but sometimes even that doesn't work..any thoughts ? P.S. Artguy rules.....but Steve, ya gotta trim the goat...e
Love CedHey Dennis, I've just completed a project using MIDI, so I might be able to help. I'

All!

Have been running Paris 3.0 on Xp for more than a year =
now, with=20
not much
problems.

I just decided to send this now to have =
your=20
view on this.

When i startup the Paris Application, the Splash =
screen=20
appears, and the
communication to the MEC starts.

For me a =
"normal"=20
startup will show the Internal reference light up, then
the sample =
rate,=20
then Master Clip and then Abit24 Clip.

But sometimes, maybe =
once on 5=20
attemps, there will be no communication with
the MEC.

The =
light up=20

sequence will not occur. then if i check in my Patchbay window, =

there are=20
some components missing.

I close up the A

Hello All!

Have been running Paris 3.0 on Xp for more than a year now, with not =
much=20
problems.

I just decided to send this now to have your view on this.

When i startup the Paris Application, the Splash screen appears, and =
the=20
communication to the MEC starts.

For me a "normal" startup will show the Internal reference light up, =
then=20
the sample rate, then Master Clip and then Abit24 Clip.

But sometimes, maybe once on 5 attemps, there will be no communication =
with=20
the MEC.

The light up sequence will not occur. then if i check in my Patchbay =
window,=20
there are some components missing.

I close up the App and start it up immediatly and it is then ok...

Has it happened to anyone,, any ideas? any driver update?

See the provided Attached images just in case

thank you!

>Hi All,
I used a pc to get the free macpac plug in and downloaded it onto a cd. How
do you unlock it on a G4 OS9 to run in paris on the G4?.

Also does anyone have the dvd from Brian Tankersley avail?Thanks at first for trying to help me out.
I got Paris running under Windows XP.
As midi i got a simple usb edirol device.
I wanna have a midiclock signal so i can sync my electribe drummachine.
But more important is that i can have a clock signal into my Korg KMS-30

to sync al my analogue modular stuff.
Then i can do jams much more easyer and make edits afterwards.
I hope this is enough information.

Cheers,

Dennis
