..I had to re-list my MEC. There are no bids yet, so if you'd like it, make me an offer and I'll take it off eBay.

Best,
StefanIs your MEC still available?IF 442 still available?My trusty ADAT card (10 years!) seems to have died -- no lights, no detection by the software... Would like to buy a working unit -- have an extra 8-out I could trade... Anybody?

jim at jimdragoministries dot orgSorry, no.Hey Paris lovers - i have an EDS-1000 for sale.

Also have an MEC for sale as well, with only the stock functionality (no expansion cards). The MEC does not have any of the front or back card-slot cover plates. (i purchased it on ebay just recently like this). It did not come with a power cable, but i can throw that in.

EDS - \$150 + shipping
MEC (and scsi cable) - \$35 + shipping

units work - as i can verify from having used them to open, play and export about 20 projects

this past week.

Let me know if you're interested.

Thanks
-dan

oh - i can only take paypal as payment.

thanks again

danHey all - no takers yet, so this will go up on ebay at some point this weekend. If you'd like to make an offer before that, please feel free. I'll update when the stuff goes online for auction.

-dl've retired from the business. Time to let my Paris rig go:

1 Mec, 8 in card, 8 out card.

1 Interface 442

2 Eds-1000 cards

1 Control 16 (mint)

All this stuff hasn't been used for several years. Last time I fired it up it all worked perfectly.

Like someone else said, make me some unreasonable offers and I'll probably take 'em...

cheers

ps. I'm in LA if anyone wants to pick up anything in personHello Mr Campbell,

I am interested in buying your whole rig if you still have it. I bought my Paris system in '98 for my basement studio and am becoming concerned something is going to fry soon. This is why I would like to by your system, for redundancy. Let me know what you want for it.

Thank you,
Chad Hi Chad,
