even though it =
looks
lined up it won't sound lined up and still the lines will have to be =
redrawn
visually incorrectly on all the tracks. I hope I'm wrong.

The next step would be to have Faderworks tell us what the total latency =
in use
is then we can offset all automation by that much across the board. =
This would
also necessitate all automation being written before plugs are applied. =
That's
not usually how I wor
