It's harder than it looks. There is an aggressive, punchy
interplay going with the drummer that requires your playing
chops to be pretty transparent so you can play right through
them to the heart of the song. We always think the Hendrix or
Vai stuff is the hardest, but it ain't necessarily so.

I can never (COULD never, in fact, even when I was just starting out) understand why people think Hendrix stuff is hard to play - it's not, really... he wasn't a technician, by any stretch... what he was was a great sonic innovator, though, that's for sure.

Vai, OTOH - now there's a technician!

Neil1.) Steve Jobs

2.) Steve Jobs

Here's why: 1.) Apple computers where the ones that a small company decided were the best platform for a product called Session8 - first marketed to radio stations for commercial production, mainly ("Come on, you can get rid of that Otari 5050!!!"), but eventually it caught on & became..... YOU GOT IT! Pro-Tools! Arguably the end of music as we knew it.

2) The iPod/iTunes combo... arguably the end of profitable music as we kn

ew it.

Discuss.

(anyone but McCloskey may participate in this portion of thread LOL!)

Neil

BTW, just for laughs, here's a sales blurb from 1996:
Digi's new Pro Tools Project is a digital audio workstation designed to provide Pro Tools functionality at a truly affordable price. The Pro Tools Project Core System includes Pro Tools 3.2 software bundled with the Session 8 Mac audio card (now renamed the Pro Tools Project Audio Card). Your I/O

choices include the 882 I/O and 882 Studio I/O. Pro Tools Project is a complete digital workstation that provides eight tracks of recording, plus many sophisticated editing and mixing tools and will be available in early 1996 at the surprising list price of just \$2495. Sorry I sniped you. Didn't know you were one of the bidders. EBay won't let

me contact you until this is paid for. My addy is animix@animas.net. OK DC,

You wanted to hear a bit of the dubs we were doing with that old Rickenbacker lap this so here 'tis. This was into my Lexicon Signature 284, output to the Lexicon 10" speaker cabinet mic'ed with an SM57 inside one of these.

<http://www.audiologyrooms.com/booths.html>

This thing sits in my CR and when the door is closed, you can crank a marshall stack to 11 and barely hear it outside. I found two of these down in Bloomfield NM that had been purchased by a friend at an auction. Got 'em both for next to nothing. Best studio iso booth I've ever (not) heard.
;o)

Hey DJ,

That's ok, man. I just got excited to see you bidding on Paris gear again, and thought you might be coming back home to our Paris communion. ;-) Not that you ever really left the group, thankfully.

If you don't need it, I could use another one, but you won it fair and square.

Best,

Luiz

Hi=20
 DJ,
hehe I am already on that testing route even with the L R =
 outputs of=20
 other
than card's a mecs...
Regarding the headphone outs the one =
 on mec=20
 A which is the main one outputs
all submixes, the other though ! =
 output=20
 only the related submix out so yes
you could route it to another =
 mec but on=20
 same mec you would get an infinite
loop of dry and compressed... =
 because=20
 the time you will bring it back on
same mec that will be again =
 outputed on=20
 headphones and then back again...
you get the picture =
 ,feedback.
Thed=20
 other mecs option though will work !!
I don't know if you have =
 considered=20
 the other better option !!
The L and R outputs of each mec (except =
 for the=20
 main one) outputs ALSO the
submix out so you can take this L and R =
 out and=20
 send it to a pair of outputs
(digital to Pulsar ??) COMPRESS it and =
 then=20
 send it back to another submix.
For latency well you know =
 faderworks ??=20
 !!
Regards,
Dimitrios
