Fared????? Sorry folks. (Jeez... I've heard that dyslexia IS a nasty disaese!)

The manual states that it can be done in c16 "pro" mode, but I don't use

"pro" mode. (and at this point in my illustrious career.. I don't really

give a sh*^ about being "pro!")

All I wanna do is automate those damn white fareds.

Happy new year to all!

Stay tuned man, I'm sure I'll have something to say relatively soon about it. (knowing me, out of the gate probably that I need more DSP, hahaha)

>Dear DJ,
Regarding VST limit of 64 you are right.
You will use vertex as DX from a wrapper like chainer, FXpansion .
Remember DX plugins have NOT the 64 limit.

I have checked that back then...

Deej,

can you please explain when I was testing wormhole with a latency of 7500 samples I could exactly record automation realtime using the mixer's fader and when played back the automation was exactly where it should.

Now is there any difference this automation now line you are reffering to ?

I would like to know.

Regards,

Dimitrios
