HKEY\_LOCAL\_MACHINE\System\CurrentControlSet\Control\PriorityControl]

"IRQ8Priority"=dword:00000000

-----

Turn off your visual effects (aka, eye-candy) - This can be done by

effect options. Next, set the Windows theme to "Classic". It'll make your OS look a bit more boring (and less like a Barbie toy), by right clicking on your desktop, and selecting "Properties", select "Windows theme" and choose "Classic".

Disable Error Reporting - You can use this for troubleshooting, but you can also disable

>I just double checked my info, according the Steve Jobs, they have a crossgrade program, were you trade in your pro disc for the new universal ones and the cost is just \$49.00. You must have the latest version of the program to do the crossgrade for \$49.00. Up grading older versions will probably cost more. The applications he named were, FCP pro, Logic Pro and aperture.
