This is simple.

Either you believe that the terror threat is real, and is a part of a larger movement to impose sharia on the west, and grows from the ideology of hate enclosed within that belief system.

(seen this?)
<http://www.obsessionthemovie.com/>

Or you think that it is somehow the things we do, or that we did years ago that have made people hate us, and if we just dia

and sadly actively avoid considering the vaster spectrum of perspectives available. From which may come other, more viable solutions. With potentially better results than we are currently experiencing.

I hope we will have the benefit of a wider range of views on these and other problems for the next couple of years. There's at least a chance of that now, but it's by no means certain. I wonder what the switch at sec of defense really means. I'm guardedly hopeful.

The last few years have, unfortunately, been more than "interesting."

Cheers,
-Jamie

to whether this length would be a problem. This will allow me to use 2 x
Pulsar's in my 7 slot Magma and on in a mobo PCI slot in a similar
configuration as I was doing with the RME HDSP cards. My 3rd Pulsar card
will be here next week. Unless there is an issue with a 24" cable run
between the 1st and 2nd Pulsar cards and only a 6" cable run between the 2nd
and third card, I should be good to go.

Well, then here you go... (2nd & 3rd ones listed on this page link):

http://elderly.com/new_instruments/cats/40N.htm Oh hey, it's a bargain. His archtops start at 10K...

Every year he brings a stunning archtop to NAMM for some enormous price. Every year it sells.
