464734e7@linux">news:464734e7@linux...</DIV>It's =
not=20

latest/greatest PCIe board, but it's definitely upgradable. It's an=20

AGP/PCI based mobo with an NForce4 chipset. The chipset will be =
a=20

problem if
you plan to use UAD-1 cards. The RAM is probably =
something=20

you'll want to
upgrade to a pair of 1GB sticks if you plan to =
use it for=20

audio. You should
be able to upgrade the CPU to an Opteron 185 =
(2.6GHz=20

per core) and have a
nice machine to run a native system, or =
pull the=20
CPU and load an AMD 64 3800
single core CPU to run it with =
Paris. If you=20
like to overclock, the 3800 x 2
has a pretty good track record =
for some=20
major MHz boosting.

oaudio.com <<http://www.adkproaudio.com/>>
(859) 635-5762 Thanks guys for the compliments. Let me also thank Mr Pirali and SSC - our
divine leaders. Miss those guys. They got it right.

-Carl

want to live with regret that you weren't a
part of the Paris Famiy photo album???

Didn't think so.

Email 'em to me at pbraun at ctgonline dot org and I'll update the
album.

Thanks.
