/>
though and am still on OSX 10.2. I have an extra internal 40 gig drive, and
two external Firewire drives (120 gig and 180 gig) and have never lost a
file. And I drag and drop files from drive to drive all the time. No gray
screen thingies either. Man, I hope my system never starts with the problems
you've described. I was thinking about upgrading to OSX Tiger, but I think I
may leave well enough alone. Like they say, if it ain't broke, don't fix it!

I'm looking at a new Power Book as we speak though, and again knocking wood
that it will behave as nicely as my G4 tower.

Wishing you better luck,

Tony
