ml" target="_blank">http://www.polesoft.com/refer.htmlIt looks like our old friend Brian Tankersley is still faithfully using

PARIS. There's a picture of a recently built studio at Lakewood Church where Brian works on page 33 of this month's MIX magazine. The text for the picture mentions that the room features an E-mu PARIS mixer.

backing them up they are gone. If you have them in project files and not
in global effects you can then just add them back into global by opening
one project at a time and pushing them into the global area. Then backup
the file PARIS_FX.VAR.

The default is just a backup of the original paris presets before we add
any.

Okay folks Chris Ludwig nailed the problem.

I had emulated versions of the MIDI in/out ports
combined with the originals. I turned the
emulated ones off and disabled them in

Cubase/Devices. This solved all the monitoring problems.

As has been stated before Mr. Ludwig IS - DA - MAN !

Thanks for all the other help David & Neil. I'm sure I'll have other questions now that I can hear what I'm doing again.

- Neil,

Thanks man. I'll will get back to you.

Well.. sounds like something's "weird" (yeah that's a technical term) in some setting somewhere. It should loop through with no problem. If you can't figure it out by tomorrow, maybe I can walk you through specific settings on the phone tomorrow evening. Let me know if you want to try that - post here or e-me directly at:
