br />

and another

card. Put different modules in the MECs so you can

see which

one is on card A, B, C =
at all

times. this will give you the info
as

to see how the cards are initializing and =
which card

is card A, B, C as you

start

adding more

hardware. the MEC i sent you is one of 4 that =
were

working

perfectly when I took my system off line. I can't imagine it

being

a

problem.

Bent pins on SCSI cables can be a serious issue though. =

Your

system

not

function with bad SCSI
