lilo-writer:-)))

Yes, us mac guys are more stupider!

;)

y rebooting from HEAT ISSUES!!!

The end

ChuckSorry about mucking up DeeJ's thread. I wasn't looking to start the whole Mac vs. PC debate. I was just thinking out loud. I go through this same kind of thing every time I build a new PC or upgrade, it's kind of a PITA.

I was just wondering if upgrading an Apple Intel mac will have the same

kind of issues? I hope they get it right. I wonder if Apple will have affordable upgrade paths? Knowing Apple, they will probably solder in the processors so you have to buy a whole new computer to upgrade.

This machine will be a whole new beast, I for one , will not be the first to dive in! It will be interesting to see how these systems perform and what problems they will have with them. People are already talking about hacking them to run dual boot, with XP and Mac OS. Dual boot would be cool.

I'm thinking, that even though Apple will be using Intel hardware software locking technology, some bod

iny VST folder, then removed
the cards in the device manager, Then I shut the machine down, shut off the
Magma, removed the host card from my PC, then rebooted. Everything was good.
Rebooted three more times....still good. Reinstalled the UAD-1 software.
shut down. Reinstalled the Magma host card. Turned on the Magma and then
rebooted the computer, Windows found all of the cards again and the machine
booted normally three times in a row. I'm ghosting this
