nally getting around to
implementing it, though, it's very useful.

The upcoming OSX feature I'm most interested in is one he didn't
mention, Time Machine. Built-in backups. That alone should be worth the
update.

Cheers,

-Jamie

www.JamieKruz.comI just tried this. It is by far, the most effective noise reduction suite
that I have ever used.....beats the Waves stuff like a red headed
stepchile.

I'm buying it.

Thanks for posting this up.

>There was an article a couple of years ago about Apple filing for some patents
and so on. The article said that the technology was already under the hood,
but not implemented. So they hacked it, and demoed how it would work in
a video. What they showed was the spinning cube thing, where the whole screen
would spin to a new desk top. They showed 4 different desk tops.
