S  
with the pro audio stuff. Using that chip in either IDE or Raid mode it  
will work fine. The raid mode will give you trouble with the back up  
software if your program uses a boot CD especially for recovery. You  
will probably need to use a Windows PE disk and pre-load the chip set  
drivers on it in order to use a boot disk.

For color I shoot Velvia almost exclusively. Problem is, all the wet labs are closing. There are only two labs left in town doing E6... and neither of them were my favorite place to take my film. One processed, I have an Epson 4990 that I use to scan the stuff into the computer. Works great.

Many audio types here in town are also avid photographers... quite a coincidence...

David.

>Funny you mention the processing. I'm just getting back into film and have been using the local 'pro' lab for processing. A 'real pro' (he makes his living from it) friend of mine showed me the negatives and scans to CD he had done at Costco and I was blown away. The prints were pretty much 'blah' but the scans of the negatives were \_gorgeous\_ and hi-res, and the negatives looked not better/worse than the 'pro' shop in town. In fact, considering the turnaround times I suspect the 'pro' shop is outsourcing the development process and only printing in house.

Anyway, I'm doing a 'bake off' of processing options. I picked up four rolls

each of Fuji and Kodak mid-priced color film and four rolls of Ilford XP-2 C-41 for B+W. I'm going to shoot them all with a combination of indoor/outdoor, humans/things, and day/night and drop off one roll of each film at Costco, Sam's Club, Wal-Mart, and the 'pro' shop. Whoever does the best job is my new film processor.

Anyway, really fun stuff, and a new geeky gadget laden hobby.

> oh stfu...trouble maker. Yup, she's a beauty. I haven't had the shutter calibrated but doing a  
rough

test (stop lens down one stop and double shutter speed, compare pictures)

it's awfully close. The rest of it was built like a roman aqueduct--to last forever.

You should pull the Nikon out. As I mentioned in the other post, I've been shooting the Ilford B+W film that is developed using standard color process. The prints onto color paper can be a bit off, but the negative are fantastic so you can scan or have things custom printed. Really, really fun.

>Hi,

I am thinking about buying a Magma solution for my PARIS system, and have read some about the 4 PCI version with internal hard disks.

What are the experiences within the community with these solutions?

How does it work with IRQ conflicts?

Is the cooling satisfactory?

Are there any software drivers required, and if so, what Windows version do they support?

Any preferences regarding host cards?

Any preferences regarding size of the Magma (4,7,13 slots) ?

Any issues that we now from running PARIS and EDS card in a standard computer?

Any others issues?

BR

Arne-J.I've loaded it in, and I guess no news is good news - seems solid here.

Wow. Would I be running the risk of jinxing things if I said this sucker now seems to be pretty well domesticated?

on new motherboards. The card that goes into the computer is 3.3 volts, so you don't have to worry about the 5 volt EDS cards being incompatible with new boards. I haven't even had to think about IRQ lines or anything like that. The cooling might as well be designed for EDS cards. There are 2 huge fans that blow down right on the side of the cards.

The only thing I would suggest is that if you get an older one like mine, make sure you get the flat cable that is supposed to come with it. They don't make them anymore, and they are rare and expensive. It would be better to get a newer one with the rounded cable if you can.

I hope this helps.

And you don't even know me... you got this summation from a few posts I created on this newsgroup? Mostly asking questions cause I don't monitor this newsgroup daily. Just how were my questions perverse, ugly or even malicious? Please explain this to me and especially your fan group.

To me you are nothing but a jerk! And one that I would love to meet in person, cause your old beastie ass can't hide behide a keyboard with your "Yea me, fuck thee" sissy attitude that you have shown more than once.

Or perhaps you got me mistaken with someone else? I am not sure what your problem is... but you certainly got issues!

And your post about the threats of the family was silly too. You make me

laugh! Or perhaps you've dissed others and maybe they weren't going to put up with your cantankerous bullshit either?

Allow me to give you a piece of advice. You see a post on here you don't like... you can really chose to ignore it, OR you can be bold and post like an idiot and start personal trouble (like you just have) with peopl you don't even know. The red pill or the blue pill. You chose!

This thread is dead! Jerk!

No way man, I'm keeping this thread open..

Next topics of discussion.. politics and religion!

Cheers,

TC

Hi All,

I think I finally found the playback locking issue on multi-core machines with the PSCL, but it's not in the PCL. When it happens, the IRQ is becoming masked (turned off), and it's definitely not happening in the PSCL. I've put into place the mother of all hacks - if the helper thread times out because the IRQs are masked, it unmask them. Since this only seems to happen when projects are loading, it works.

The Scherzo masks the IRQs during the interrupt service routine and the delayed procedure call. I think they are stepping on each other if the DPC is delayed enough than a new interrupt fires before it finishes.

I'm going to figure out how to compile the scherzo and put some locking around the IRQ masks. I'm pretty sure that's where the true fix lies. The delays I was putting in probably just gave more CPU time to the scherzo by putting the app to sleep for short times, reducing delays in the driver and improving the problem without solving it.

We're very, very close to putting this thing to bed.

After that, I'm going to work on the ASIO driver. After that, migrating parts of the PSCL into the scherzo so we can get some wav drivers going.

Cheers!

Mike
