using a gate is not useful.

I have basically decided to automate a 8 db ramp up to and down from the
vocal sections and then copy and paste through the songs...quick simple and
a pain in the ass.

Don

It is not the plugin under other song I can open a stereo native effect.
In my project I cannot open ANY stereo effect.
Even chainer only...
I can save my project no problem if I don't use a stereo native effect.

ALSO on submix 3 I managed to open a stereo native effect but not on submix 1 or 4 , any suggestion ?

Regards,
Dimitrios
