hapters organized in a nice accordion folder.

If no one is interested I will toss the whole bunch by the end of the week. I would only ask for \$10 to cover the shipping.

E-mail me at bachandroll@yahoo.com if you're interested. Thanks!

Cory BonnettHey Cory, I'll take you up on the offer. Let me know how you'd like me to get the money to you.

TyroneAdded second card back to re-platformed PARIS Rig - Scherzo Puts itself at IRQ 11 where ATI Radeon is.

Win XP Pro sp1

Any ideas?

EnnioTry a different PCI slot.

David.

BWAH HAH HA HA!!

Good one.

And actually it takes 5 bucks to play a tune. Oh, and it's MP3...

heh heh

DCScott, print this out and tape it to the inside of your paris rig for the
next round :)
As well, I think I included this stuff for Tony that he probably has up on
his website.
Sorry I didn't get to you sooner man, it's been crazy 'round here.

I am actually trying to source a Behringer product right now (gasp!!!!.....yeah....I know ;o). The only Behringer product that I have ever used that worked well and as advertized is an AD/DA/format converter called the Ultramatch Pro SRC 2496. I've got one and need another one in order to do something else bizarre with my routing matrix. Anyway, I have scoured the internet for one of these to no avail. I was talking to a retailer in Nashville earlier today and was told that this and the ADA8000 may not be showing up again due to a patent infringement situation involving Apogee. I'm wondering if this is true. Anyone else heard this? Anyone got an Ultramatch Pro FS? I need one yesterday. They are backordered everywhere with mid-January as the projected date for filling orders. Sorry, I think I finally figured out this DNS re-directing stuff. This one should s

ris cards are NOT in shared slots.
Then you can turn things back on and see what irq's they give up. I'm
in win98 and the EDS cards get IRQ 3 everytime as long as everything
else is off. I use only a sound card on the MB and an ethernet card to
do the rest.

r about an hourrecording on Paris,
with the assertion message sitting on the middle of the screen. (no clients
present, obvioulsy)switching windows, dragging 14 tracks of drums to and
from jails....while playing, recording new takes, saveing, save as, etc.
Only when I tried to "delete last take" did it lock up on me. I had to close
out the assertion window. Only then did Paris crash, as I expected. I'm just
posting this finding in case this ever happens during a magic take, or whatever,
just let it go. When you can, do a save as, for safety, then click on the
message and reboot. I kind of felt like Kramer when he tested the limits
of the gas tank. Living on the edge.
:-)
Rodyeah,...just say no...;o)

this

environment. Even Apple is participating in open source to an extent at the kernel and browser levels.

I am not opposed to companies making money on their technology when competing fairly on merits and pushing the envelope to provide needed tools. I'm happy to pay fair prices for hardware and software when they meets my needs, and to support talented engineers in the quest. I originally bought PARIS for that reason.

But using monopolistic leve

raging, Orwellian marketspeak, and swallowing other companies while killing a lot of great competitive tech and promoting marginal tech, that kind of behavior doesn't endear much respect.

I got into Macs this time around because of OSX and the continued strides being made with OSX production software. After years of misdirection with OS7-8-9 and failed attempts to significantly progress, with OSX Apple was able to push the envelope to provide improved technology for computing, media production, and lately, media distribution.

I'm not saying Apple is perfect, there are disadvantages to some of their decisions and they have had a lot of reports from me to help them improve. :^) But the advantages of OSX, generally solid hardware like the current dual G5s, and a steady stream of capable software transcend the disadvantages right now.

Good luck with your computer and music pursuits! When the time comes to move your music production over to Linux I'd love to hear how it goes.

Cheers,

-Jamie

t;Thanks for your suggestions.

I have rendered using the hardware method via adat and achieved one nice compact stereo track with my acoustic guitars, I even saved all audio files on new folder and saved under new name I used the clear missing files just before that but again no luck when I put a stereo native effect on this stereotrack even without hitting play when I try to save assertion fails and doesn't allow of any save !

Note that assertion failure appears ONLY when I hit SAve ...

Dimitrios,
Are you saying you can save before this stereo plugin
is inserted? I'd say you may have a rouge plugin that
your wrapper or Paris just doesn't like. Try the same thing
in a different project. ie: Same stereo plugin inserted

on another stereo pair of tracks. Now can you save?
If so it may be your project. If not it's probably your plugin.

Good luck,

Tom

-----=_NextPart_000_000C_01C5F72E.9D1B5E60--Hi All

Dumb Q time...

I've got a little side project from a friend, nothing fancy just a quick mix
of his band's live show but I don't want to spend any more time than is
necessary on this thing.

My question has to do with reducing the level of the the lead vocal mic when
it's not in use.

Normally I would just drop the fader 3db or so on that mic when it's not in
use but I started wondering if there is a plug in i.e. an expander or ducker
for example (never having used either of these beasts) that might do this
automatically.

Thanks in advance
