> Hey AA! Sorry...it seems I was not clear in my response about Roxio. The physical  
drive has long since been removed. System has HD primary, slave and 1 CD/DVD  
burner. I just noticed that Roxio was still listed under hardware profiles  
listings so I removed it. Reboot and still no go on the system seeing a  
CD/DVD drive. When I try to launch Nero, I get the following message.

"The Win-ASPI file '?.' cannot be found, therefore you can currently select  
only image recorders.

This missing file is one of the Windows 95/98/ME files. Please fix the problem  
then restart Nero.

(Error 12 Init failed)"

Does this help any?

Take the Waves SSL plugs.. You have to have a certain graqphics card performance,  
or they won;t run well..
