[http://cgi.ebay.com/Furman-HDS-16-Headphone-Dist-Syst-4-HRM- 16-Rem-Mixers_W0QQitemZ7413631822QQcategoryZ3278QQssPageNameZWVWQQrdZ1QQcmd ZViewItem](http://cgi.ebay.com/Furman-HDS-16-Headphone-Dist-Syst-4-HRM-16-Rem-Mixers_W0QQitemZ7413631822QQcategoryZ3278QQssPageNameZWVWQQrdZ1QQcmdZViewItem)

From time to time, threads pop up here about cue mixing in Paris. I have a system similar to this one here and I can tell you for sure that this thing is an excellent cue mix system for large (and small) tracking sessions. The remote units have enough juice to drive AKG K240 600 ohm cans. It's incredibly versatile and the remotes have FX sends and returns. I've got my remotes paired with small outboard reverbs on each one (Alesis Wedge Units). It's a dream come true and tracking sessions go really smoothly with these. The fidelity is excellent.

This is the first time I've ever seen one of these systems for sale on EBay. If you need a cue system for large sessions and don't use a big desk.....this is the ticket.

I just thought some of you guys might be interested in this.

Deejooooooooohhhh.....the Window key eh????

;o}

IMHO. It really is like having a grand piano available (well three actually,
though like you, I tend to gravitate toward the Steiny D) and you don't have
to spend \$20k for the mics to fully capture it.

;o)

I choose Polesoft Lockspam to fight spam, and you?
<http://www.polesoft.com/refer.html>Dear Paris user...
The following is the easiest and CHEAPEST WAY TO DO THIS WITH COMPLETE time
allignment.

First you buy Chainer VST wrapper... and thats the only expense you make.

Then you put chainer on every drumtrack, kick snare, OH's, Tom1,Tom2,Tom3
whatever...

Now on each Chainer you put on its first slot the input module, then on slot2

you put a vst compressor, many free out there, most of them are 0 latent !

I have posted some names before.

There you squash the hell out of your compressor which means you have a 100% wet compressed and heavily squashed drumtrack.

Now chainer has also dry control !, meaning you can add "uncompressed" sound too...

You do exactly the same for all your drumtracks.

On you stereo drumtracks like OH's you put a stereo instance of chainer doing the same things...

Chainer can take this thing steps further...

It has 10 pages so you can add EQ another compressor, whatever all time aligned , I also have posted about that.

Dead simple cheap enough and extremely effective.

No nudging, no latency compensation.

Beware, wavesren has 64 samples latency, T-racks has also 64 samples latency,

Waves C1 though has 0 latency.

MOST OTHER COMPRESSORS INCLUDING COMMERCIAL ONES ARE) LATent ...

Hope this helps

Regards,

Dimitrios
