Google Jim Williams Audio Upgrades and give him a call. He's a gearhead so he usually answers his phone at times when normal people wouldn't.

;o)

What kind of native plugins would you guys like to see developed for Paris?

What do you think you guys would be willing to pay for these plugins?

If we could get the algorithms ported from the Ensoniq DP pro, what would you guys be willing to pay for that?

I'm not sure that this is possible, but, what would you guys be willing to pay for automatic plugin delay compensation?

If you could have somebody do coding work for Paris, what would you have them do? What would you be willing to pay for this software/service?

I may have somebody interested.

JamesYou are right, although I really got started with drinking as a kid in Bermuda. If you could see over the bar you could get a drink. They call

Heineken the Green Gorilla. Another Bermuda drink is the Dark and Stormy which is dark rum and ginger beer.
