The guitars were a bummer, though.

Curt

>Hey Terry,

It could be a good idea to get a program like "Everest" by www.lavalys.com .
Then you can get all informations you need about your "new" XP computer,
what motherboard-type, what legal XP number, what kind of memory etc. etc.
etc.

I believe you also must change the powersupply. Get a 500-600 watts with a
big slowgoing lownoise fan, that can be used with that old board.

> 3 What should I do or not do before installing Paris? Well, this is interesting . . . I too have been
running PARIS in Windows '98
on an old PII from the year 2000 or something, and I was also just given a
much newer computer with XP on in. I don't even know what's in it yet, cuz
I haven't fired it up or cracked it open, but the idea is to install our
other PARIS system in it. And I, too, am an RN, though not a travelling
one. I'll pay close attention to your responses, so I don't wind up asking
the same questions. :)

SHAMELESS PLUG ALERT

We're working on our second all PARIS CD album now on that same old beat up
computer, but in case anyone missed the first . . . it can be had at
www.sarahthonin.com/wayward.htm or www.cdbaby.com/sarahthonin or on iTunes and
a bunch of those other song downloading places.

CD #2 is called "Angel Food" and demo samples will soon be posted on our
site.

Thank you, and have a lovely tomorrow,

Sarah

Chuck has offered to send me the mac he used to compile the plugins, but work has kept him out of the country for weeks at a time. I'm sure when he's home, his priority is seeing his family. It will happen. It's just going to be a bit longer.

All the best,

Mike

Setup / XP SetupWhole thing is a bummer dude, hate to hear it. Sounds like you're pretty on
top of it locally though, so hopefully you'll catch the nabber and toss his
lame butt in the slammer.

I have a G4 Dual 1.25 that will be available soon. My wife is migrating her stuff to a new box. Should be done in the next week. I can meet you in TO to drop it off. I'll also bring a cheque to help with the MAC side of things...

Let me know

>Hi Terry,

This sounds like a really good PARIS machine. Here's what I would do:

Partition the drive and have Windows 98 and Windows XP installed. You'll need the installation CDs for both. You also need to be mindful that Windows 98 requires a third party driver to access a hard drive larger than 120GB.

The Windows XP driver can still be tempermental. Keep 98 around just in case.

Also, Windows XP requires at least 1.25 GB of Ram to work well for Audio.

The disk cache will try to cache your whole project up to 1 GB, forcing program code into the swap file and bogging down the machine if you only have 1 GB or less. It drove me nuts until I got more than 1 GB.

I hope thses suggestions are helpful!

Mike

Yes it's a dual boot thingy, just like the
dual 867 that I run PARIS on.

Wonder why your's doesn't. You've got the OS9 operating
system installed somewhere yes? Then under system prefs,

just select OS9 on discxxx to boot from (I'm sure you know all that).

TedThere was a last generation of dual boot 1.25 GHz dual processor G4's. I have one of those too. The next generation had a Firewire 800 port and couldn't boot in OS 9.

><http://video.google.com/videoplay?docid=5232639329002339531>doneHi Ted,

That is very kind, but I think I'll be ok with my emulator. Chuck has a mac with a very unusual compiler setup that he said was absolutely necessary to get the plugins to compile for the Mac. He's been out of the country working for the last while, and I suspect when he has been home, being with his family has been the priority.

As soon as I get the Mac, I'll compile the plugins. It will probably take less than a night (fingers crossed). The alternative is that we can try an older version of code warrior to see how it goes. I may have better luck than Chuck did. You never know. If I can't run code warrior in the emulator, your Mac will be most welcome. :)

It will happen.

All the best,

Mike

When Chuck Norris sends in his taxes, he sends blank forms and includes only
a picture of himself, crouched and ready to attack. Chuck Norris has not

of business.

This pro hall is one of the best I have ever heard !!

Dear Mike,
One hint.
Could you please INCREASE the predelay on all your new reverbs ??
It is very small !
Thanks again for what you are doing for us !!
I will be getting more eds cards just for these !!!!!
My compliments.
DimitriosOh and one else !
I can make these plugins work as mono inserts.
Could you please ,if possible, add a dry wet control on Drum plate at least?
Sometimes is great to just insert a mono reverb on a specific track when
your auxes are already full !
Regards,
Dimitrios

>DimitriosOnce, Chuck Norris was hired as an agent for special assignment.
He was given an address and told to go collect said taxes from a
reluctant payee.

He shows up and it is Chuck Norris' house, they shake hands and
Chuck goes back to the office and kills them all.

;p
