here I was yesterday just before I installed=20

Chucks plugs and a few VSTs that are wrapped.

The stock fx are working but not all of Chucks.

The presets weren't there for the stock ones either.

do a flat, no frills install man. no FX other than the stock =
ones. StockFx.dll is what comes with. mod3a.dll I 'think' is a chuck =
plug, but I could be wrong about that one. Stock, bone dead stock =
install and see what happens. Also, I've noted over the years when =
installing/uninstalling paris you need to boot/reboot cold to get it =

uninstall. Reboot. Delete anything left behind. Reboot. Install. Reboot. =
Does it work at this point in the game?

modulation bundle=20

don't show up either. They're probably one of the problem =
here.

replace the files

No Pace.

Today's the day.
