hat's what I'd do if I could get it to install.

After uninstalling and removing the Scherzo drivers I have=20
updated the pace drivers. I install Paris 3.0 and there's nothing =
anywhere
on the C drive after it says it's successfully installed.
Not in Add/Remove Programs nor in All Programs. This is after I restart
the computer. The Scherzo drivers install one at a time. The Subsystem =
1.05
installs like a charm. It also suggests the Remove MIDI line from the =
..cfg .

Something is very very fishy around here.
Any ideas?
Dopey

bundle 3, being carefule and methodical along the way, and =
ghosting.
So I=20
would say do it a step at a time. But there's also a gut feeling =
that
it=20
may be good to have everything hooked up when you reinstall the =
Paris
app,=20
and let it see everything. How's that for non-commital?
(pay no =
attention=20
to my speling).
