dio to =

these synths I

have to reconnect the USB but the preset that allows the Amiga to edit =
no longer works!

Pain in the sphincter.

Major problem #1:

I set Cubase's MIDI input to #1 which is my controller's MIDI port but =
can't receive data

in Cubase. How should that be set to record MIDI data? I'm hoping to =
figure this out
on my own.

you have=20
the midi cables
 connected to there proper port=20
assignments. i have mine (4 version)
 =
connected to=20
both my mac and pc via a usb hub and also using midi
 =
cables=20
connected to the various gear (m24 controller and a pro 88=20
kb).
