and yes I'll admit that is based on my long standing dislike of anything
Behringer.

Do a mix of one of your tunes with NO EQ or EFX whatsoever;
just raw tracks, balanced out more or less evenly so that you
can hear everything. Pan a little bit if you wanna, but nothing
too severe L&R unless it's a stereo track - no EQ, no 'verbs,
no dynamics - nothing. Then burn that off to a CD - if that
doesn't sound anything like the mix in your room, then it's
your room or something's funky goin' on between your rig & the
monitors... if it DOES sound like in your room, then it's the
way you're mixing stuff - choices you're making when EQ'ing adding EFX, etc.

Try it... that way you have a true starting point.

You dither huh? . . .

"Cujo" <chris@nospamapplemanstudio.com> wrote in message =
news:4532d7e6\$1@linux...

It's really hard to describe, it has to be the room, but somewhere in =
the
balance of bass and treble it seems that it is pretty dang close in my =
room
to the reference CD's but I get to the car and I have to turn the bass =
down
1 and trebl up 2 clicks to get it where it felt in the house. but it =
isn't
only that, but in my control room, the mises sound clear, 3 =
dimensional and
"airy" but the CD burns sound almost hazy, like the presence area has =
been
compressed and almost glassy in bad way, Dirty Glassy, and somehow not =
as
full range. So, the EQ thing bass and treble would be =
understandable,, but
this mushieness freaks me out, I really wonder if it my conversion to =

16

bit, or something else, I'll try the Wavelab dither tomorrow.

my stuff still gets some nice nods critically, but it is not how I =
want it
to sound!

hey is anyone running mixes through any mic pres? Anyone here have a =
1968ME
compressor?

Another option for a DAW is SawStudio...I've been working with a demo for a while and although it's a little odd in the way it does things it's a pretty solid application and according to anecdotal info has a great sound on it's own...I've been summing through Paris so I really can't comment on it.

YMMV
