latency compensation for vsts and able to do > 64 tracks with the pro features  
like Paris? If DJ pitches in, cost is no object but for now I need cheap.

16 ins and outs would be nice 64 tracks lets you out of all the light software, and latency  
compensation lets out a few more. I would say the new Studio 4 from  
Steinberg would be decent (or SX), once they patch it once or twice.

pdf of features: [http://knowledgebase.steinberg.de/158\\_1.html](http://knowledgebase.steinberg.de/158_1.html)

For interfaces, you can't go wrong with a pair of RME multi-face/PCI  
cards.

<http://www.rme-audio.com/english/hdsp/multifa.htm>

Keep in mind, you may want to wait till they go PCI-e so you have some  
growth capability compu
