tia,

-CarlHey Chuck,

try Jeff Wagner at Wagtech - <http://www.wagtechsound.com/sound-lights.htm>.

He's a good guy, has good gear and good people working for him. I think
he's also reasonably priced... he's certainly a lot cheaper than Maryland
Sound!

There are elements of the Patriot act; our move toward justifying
torture; and aspects to wholesale wiretapping of American citizens that
are very unamerican IMO.

We must be extremely careful that we do not permanently lose our place
in history as a great step forward in personal freedom and opportunity.
Either by some nutcase reducing St. Louis to a nuclear wasteland or by
some other nutcase legislating away our core ideals. I don't care how
sincere the nutcase, those are both extremely damaging actions to America.

This is not an easy problem, so we need every viable idea on the table
and we need to come together with respect. And we need to remember:

"Those who would give up Essential Liberty to purchase a little
Temporary Safety, deserve neither Liberty nor Safety." -Ben Franklin.

Cheers,

-Jamie

ping the Sunnis, Shiites, and Kurds from tearing each other up. Now it looks like that will happen anyway. The problem there is so huge and complicated, that I don't have hope anyone can "fix" it. We didn't create the "real" problem though. We just removed Hussein so the various divisions in Iraq could get back to their centuries old civil war unimpeded.

I don't believe being tough with terrorists should be our only course of action. We need to explore all avenues to work toward better relations in the Middle East, and all around the world. Take care of protecting ourselves right now, and I'm all over the making friends thing.

I must have mis-interpreted your "wacky beliefs of a few terrorists" statement. I thought you were implying that our risk from terrorists is not real, or something we need not aggressively address.

I have a hypothetical question for you Jamie. If by some miracle we could reverse all the failed policy and all of our mis-steps, Israel went away, basically remove any and all reasons for the terrorists to hate us, what if after all that, they still hate us and want us dead? What if it really is a war of ideology? What if the "infidels" really must convert or die? What then? I don't wish anyone to die by war, aggression or violence, but at what point do we decide to either fight or lay down and wait to die. I pray to God that this isn't the case. I hope somehow we can find common ground and live in peace with everyone. I haven't heard the terrorists ever express this option though.

I anticipate your response, but will refrain from replying back. You have much greater debating skills than I, and besides, I've already broken my promise not to get involved in political threads. I'm such an opinionated ass! ;>)

With Respect,

Tony

;Basic process (from an unmodified XP theme)

Click start > settings > control panel

In the control panel, double click the "network connections" icon

In the new window that appears, should be something list under LAN OR HIGH SPEED, usually "Local area Connection"

Right click on that connection and choose "properties" from the drop down menu.

In the new window that appears, there is a configure button. Click on it. Then click on the "advanced" tab What you will see will vary depending on the Lan card and its driver. You are looking for three things in the list of parameters; link speed, duplex, and flow control.

Sometimes speed and duplex are combined.

I'd get the recommendation from FX-teleport for duplex and flow control settings. My recommendation is:

Speed: 100 (or 1000 if available)

Duplex: full (as opposed to half)

Flowcontrol: disabled

Also got to the "power management" tab and turn off power management.

Make sure both machines are configured exactly the same for these three parameters. Once this is all done Click "ok" once.

On the Local area connections properties page (you should have returned there), there's a box with the following heading "This connection uses the following items". Scroll, usually to the bottom, and you'll find the "internet protocol (TCP/IP)". Click on it and click on the

"properties" button below.

On the general page that appears, select the "use the following ip address" radio button. Here's a config that will work for each machine

Comp 2

IP address: 192.168.1.2

Subnet Mask: 255.255.255.0

Comp 3

IP Address: 192.168.1.3

Subnet Mask: 255.255.255.0

Gateway and DNS information is unnecessary, because you will not be going to the internet.

Click "ok" and click "close". Stay on the network connections box to start verification.

TO test the connection once both are configured, from computer 2, first connect the crossover cable. Look in the network connections boax and verify that status is connected for your local area connection. If it is, great, if not, go back and verify the link speed, duplex, and flow control are exactl yhe same on bothe machines.

If status is connected,

click start>run and type in cmd the click ok.

In the black command prompt box type (without quotes) "ping 192.168.1.3"

If you used the recommended address on computers 2 and three, this should cause you to get replies.

Lots o steps, but it is pretty complete. If it's too confusing, let me know, and we can look at a live walk thru once you have both mahcines setup.

So if a terrorist said "jump or you're weak" you'd jump? Or would THAT be a sign of weakness? I say jumping at the behest of terrorists is a sign of weakness and a way to cede control to terrorists.

```

```

Kinda, but don't forget that modern day Iraq was imposed from the outside by others:

"Iraq was carved out of the Ottoman Empire by the French and British as agreed in the Sykes-Picot Agreement. On 11 November 1920 it became a League of Nations mandate under British control with the name "State of Iraq".

The British government laid out the political and constitutional

Iraq and defined the territorial limits of Iraq without taking into account the aspirations of the different ethnic and religious groups in the country, in particular those of the Kurds to the north. Britain had to put down a major revolt against its policies between 1920 and 1922."

More: http://en.wikipedia.org/wiki/History_of_Iraq

And don't forget that Saddam came to power with our help and assistance, as part of our cold war policies:

"In 1958, a year after Saddam had joined the Ba'ath party, army officers led by General Abdul Karim Qassim overthrew Faisal II of Iraq. The Ba'athists opposed the new government, and in 1959, Saddam was involved in the attempted United States-backed plot to assassinate Qassim.[12] Saddam was shot in the leg, but escaped to Tikrit with the help of CIA and Egyptian intelligence agents. Saddam then crossed into Syria and was transferred to Beirut for a brief CIA training course. From there he moved to Cairo where he made frequent visits to the American embassy. During this time the CIA placed him in a upper-class apartment observed by CIA and Egyptian operatives. (UPI 'analysis' article) He was sentenced to death in absentia. Saddam studied law at the Cairo University during his exile.

Rise to power

Concerned about Qassim's growing ties to Communists, the CIA gave assistance to the Ba'ath Party and other regime opponents.[5] Army officers with ties to the Ba'ath Party overthrew Qassim in a coup in 1963. Ba'athist leaders were appointed to the cabinet and Abdul Salam Arif became president. Arif dismissed and arrested the Ba'athist leaders later that year. Saddam returned to Iraq, but was imprisoned in 1964. He escaped prison in 1967 and quickly became a leading member of the party. In 1968, Saddam participated in a bloodless coup led by Ahmad Hassan al-Bakr that overthrew Abdul Rahman Arif. al-Bakr was named president and Saddam was named his deputy. Saddam soon became the regime's strongman. According to biographers, Saddam never forgot the tensions within the first Ba'athist government, which informed his measures to promote Ba'ath party unity as well as his ruthless resolve to maintain power and programs to ensure social stability."

Sure it's real. And it's intertwined with Western involvement in the

region as mentioned above. Forget that and you lose sight of reality and end up in a blind boogiemans fight. The danger there is the boogiemans becomes this unknown terror that can grow in your head. This way lies madness. If both sides do that, and they have to some extent, it becomes an escalating hatfield mccoys thing, as in Israel - with no end in sight and the whole world eventually in the balance.

There have been statements but it's hard to put much stake in them. However you can likely read them for yourself on the net, it's at least interesting to see what Osama's stated reasons are for using terrorist actions, and what he says it would take to make them stop. Keeping in mind that he has lied before.

However it is important to understand the needs of people in the region so we don't inadvertently walk into the trap of setting ourselves up as the perceived bad guys, thus encouraging what we don't want, which is more people being convinced to join al-Qaeda.

Have you ever seen the sorcerer's apprentice bit in Fantasia? Good intentions and amazing power isn't enough, we have to be smart about our policies. We have to understand the power we wield and be as aware and as proactive as possible about unintended consequences.

There are interesting tidbits here, including rumors of Osama's death:

http://en.wikipedia.org/wiki/Osama_bin_Laden

As to your question, I am not interested in reliving the crusades now, in the year 2006. I think very few people are, unless whipped up into self righteous fervor by ardent nationalism to the point of jingoism, (in place of patriotism). Whipped up for the benefit of some wannabe despot or someone's short term financial gain at great expense to the world. I think we may finally be getting to the point where such intentions can be seen through. The challenge is to recognize and head that stuff off. Be aware of the tools of dictatorship anywhere such manipulations appear.

But since you asked, I will not convert forcibly to anyone else's religion. Not Osama's take on it nor Bob Jone's take on it. And I'd thank any corrupt or ignorant politicians, wannabe despots, wannabe afterlife virgin collectors and ill-informed uberfundamentalists everywhere to quit fighting and killing each other over matters of God. How absurd, ironic and pathetic. Live with integrity, find your potential, walk your spiritual path and respect the rights of others to do the same.

I believe in freedom of religion, which is guaranteed by our constitution and is our right in any case. Believe what you feel is true, but respect the right of others to do so as well.

Be free to talk and listen, communication is essential and freedom of speech is another basic human right. But remember that your right to swing your fist ends before my face begins. Don't tread on me, bucko.

I also believe in personal responsibility. Mine and that of every citizen that wants our great experiment to continue. We face threats to our system both external and internal and must be ever vigilant. We must be proactive, intelligent and constantly educate ourselves using multiple sources. We must not be manipulated into betraying our rights.

Yep I believe in freedom. Don't even think of taking that away. If you agree, let's stand together.

> I anticipate your response, but will refrain from replying back. You have
> much greater debating skills than I, and besides, I've already broken my
> promise not to get involved in political threads. I'm such an opinionated
> ass! ;>)

Opinions are great, thanks for sharing. And listening. I appreciate the conversation.

United we stand. We have work to do.

Cheers,
-Jamie
