at least four submix stems, then
import those into a new project either for a straight-ahead
group mixdown or mastering & you can DEFINITELY hear a
difference that way. It's not a huge difference, but it's
definitely one you'll notice.

I'm pretty sure the Steinberg stuff is the only DAW solution
that will do literally everything you specify above, without
exception.

NeilHey, nice rack! (err.... I mean the rack for mounting the toms
& cymbals on).

That's a nice setup, there, Tony. What's the I see off to your
left near the hats - is that a drum pad/e-drum rig of some
kind? Can't tell.

Neil

-----=_NextPart_000_0123_01C6EF95.74BDD000--How about buying some Behringer ADA
8000's and just review the a/d d/a line
level sections for me. Forget the preamps. I want to know if they sound
as fantastic as I'm reading on a variety of sites.

But some RME multiface too and compare. Thanks !!

hehe,
JohnHey DJ,

Quick question on your method... why are you nudging *all* Paris tracks? Seems pointless unless you meant nudge all tracks being used for external inserts only.

Just checking ;-)

David.

>I'm doing a 36 track mix in Cubase SX right now with 8 x stereo stems routed to Paris submix 1. Very stable. Sounding better and better as I go. I feel sorta' like I just stepped in poo, but as I get the hang of it I'm thinking I just might be able to achieve something *very nice*.

Neil/Martin/LaMont/Dedric..et al, are correct about the mix bus being much improved these days. It's just a different journey to get there.

I'd *really* like to get this thing happening with Forte but unless we can get enough folks together to justify it for the developer, We're getting close to finishing some tracking on a project here and the mixes are coming up pretty soon so it's getting to be close to time to take off the lab coat, put Igor back in the dungeon and think in terms of getting these up and ready to go.

I've thought through using 3 x computers running Forte. I would need to get another Multiface and another UAD-1 to get this happening the way I need to and the thought of simultaneously digitally bussing multiple outboard FX processors through three computers is making me sorta queasy. Without each interface receiving a BNC feed directly off the house clock (which they can't do), this is a trainwreck in the making and then I'm back to square 1. I would have to do this in order to accomplish the aux routing across submixes that I would want to do and I'm already fried just thinking about this one.

(sigh)"Martin Harrington" <lendan@bigpond.net.au> wrote:

>idiot, (probably).

I think you're getting confused with the "wires" add-on which was included in the effects subsystem patch that Chuck and co developed. This doesn't work with rewire however, it simply increases your patching options around Paris itself.

Cheers,
Kim.
