>Great minds think alike. ;^)

I did another PARIS upgrade message on an April 1st a few years back, and got a private email from a very sincere non-English-speaking guy who wanted to know where to buy it. I had to gently dash his hopes and tell him it was a joke.

So this time, hope

>I was a beta tester !Ok - this is no April fool's joke. I'm just now getting around to checking this plugin out. I must also say - that I *really* don't dig digital amp stuff, but upon initially messing around with this (basically just turning it on), I am certainly not scared off, and have a feeling that I will probably end up using it more than I would think so.

These samples are from a project that I'm in the middle of wrapping up. It's a collaboration between myself and a good friend - it's a strange fusion of styles. The group is called Fingerpuppet Orchestra, and the song is called Disco Rodeo, and you should hear Mike's plug on it.

More details here.... <http://www.carlamburn.com/Audet.htm>

>Hi Thad,
Yes with out keeping up with the XP security fixes you will allot more
than MS getting into your machine. If the machine is gonna be one the
internet then he really need em. Zone Alarm is almost as bad as Norton
when it comes to taking over your system and doesn't really work any
better than the built in MS firewall.

PS- Thad you still want one of those express cards?

chrisl@adkproaudio.com Love that wah wah banjo, man. So the guitar is using the plug in. It sounds

dry and natural, what exactly is the plug doing? I can't tell, sorry for being so dense.

>> -CarlHey Gantt, I want to ask a couple more Qs about your diagram and the
sounds you get. I went over to Guitar Center and played a PRS on Sunday
and I now know what the usual 5 position PRS wiring offers. I was
impressed by the sounds available and I liked the differences between
the 2 non humbucker positions. My impression from playing the standard
PRS was that it has hot pickups. Would you concur? I ask because that
may be one of the reasons the system they use works so well. On the
other hand a guitar with typical mid or low gain humbuckers may not get
such a robust sound from the split coils. That's a possible theory and
may explain why I was unsatisfied with the results I got when I tried
such things in the past (way in the past actu
