Tom,

Are you using a default project with =
PARIS? =20
I'm so =3D
>sorry of=3D20
> this has =
been
asked and=20
answered already. If so, perhaps it =
=3D
>is=3D20
> =20
telling card zero to lock
to an external clock, which it =
can't=20
=3D
>because=3D20
> there isn't =
one.

It=20
would be interesting to attach an=20
external
=3D
>clock=3D20
> source to the MEC=20
and
then start PARIS to see how it behaves. =
=3D
>Or,=20
if=3D20
> the clock generator is fried,
tell =
paris to=20
lock externally and see
=3D
>what=3D20
> =
happens when an=20
external clock
source is applied.

Isn't =
there
=3D
>a=3D20
> master house synch switch =
in the cfg=20
file? I've never =3D
>used
it. =
=3D20
> Maybe=20
DJ could help with what that should/shouldn't be set=20
=3D
>to.

Wish I=3D20
> could =
do more than=20
think out loud...

-----=_NextPart_000_000A_01C8145D.50528B00--Hi Tom,

Yikes! Well, removing the house synch line from the cfg file and removing

the default project would not affect whether Windows boots or not. Both are not looked at by anything until the PARIS application loads.

This is sounding more like either damaged EDS card(s) or a bad motherboard.

I'm not sure this will make you feel any better, but we had basically the same experience at work with an EMU 1820M. The external breakout box died, and Adobe Audition became useless. It was the same kind of nightmare. Two employees stayed up all night trying to sort it out to get a tape out to a TV station the next day.

I wouldn't give up on PARIS over this. Hardware failures happen no matter what platform you use - even tape - and they can be hell to sort out.

I'd ask your tech to lend you a PC, and just try installing a simple PARIS system in there. If it works, just get a new PC.

I look forward to reading your post when you get this sorted out!

Good luck,

Mike
