-----070505020502080206050000--Wow!

Big place. Will you use scaffolding or does that enclosure
come down?

I can only imagine the number of structural approvals needed
for that project!

very cool. Let me know how it comes out. I love to fire up
new systems. (hey waddya mean the mids are gone on the
left??)

I heard from an insider Steinberg is still committed to Cubase too. Man, what a world we live in! I'm getting kind of dewey. It's like a great big world-wide renewing of vows!

I sure would like to see us go to vbulletin...

<http://www.vbulletin.com/>

Yes, I am willing to contribute to it. You have to register, and the admin can publish guidelines. Moderating is relatively easy, with points assigned for various infractions and the app automatically suspending someone who hits the limit for a predetermined time.

We would need some folks to help moderate, but I think it would be well worth it to keep us on-topic and stop some of this drive-by shooting.. errr, posting.

The two towers you see on the other side contain winch motors and the whole mess gets lowered to the ground. The entrance to the cluster is on the underside, so we stop at about 8'. Currently it houses 24 JBL 15" front load woofers and 36 2445 drivers on standard lens'. This was a fine INDOOR PA in it's time ;-) but the weather has taken its toll over the years and it's now time for replacement. The trick was to find a solution that would keep the existing structure, and reduce the net weight load so we wouldn't have to go through re-engineering the towers and cables. The structure is about 20' across and 12' tall. We will be installing 5 sticks of 9 boxes each, one for each quadrant and one for north end zone coverage for special events and times where extra seating is set up (Grey Cup). We are using 23 EV TG7 amps (see attached) to power the system (and concourse feeds)... right around 85KW of output at the spec'd load impedance! Should be fun to crank up!! :-) The cool thing about these amps is they are completely auto-ranging from 100V to 240V... we will be running them on 208V Single phase power... no Neutral!

I will be taking pictures of the install as it goes. I will stick them up on our site and let you know when it's there.

>Hey DC -

Have a look at these options and see if they do it for you. They have the advantage of being free (which is a good thing because some things may be coming up on the horizon that PARIS users just might want to *cough* reserve their cash for), feature pretty rich feature sets, good access control including moderation, and one-click installation.

PHPBB: <http://www.phpbb.com/>
PunBB: <http://punbb.informer.com/>
bbPress: <http://bbpress.org/>

Here's a feature that could be added easily if people were interested in reviving the old chats:

PhpFreeChat <http://www.phpfreechat.net/>

The resources nowadays are going nuts. Free on my server is Drupal, Wordpress, Joomla, photogalleries, chats, forums, calendar, webmail servers, survey tools and a ton of other things, none of which require a particularly high degree of tech savvy or maintenance.

- Kerry
