Then you should know...

You think the United States does not derive economic benefit from having
its currency serve as the dominant international reserve currency?

You think the big oil companies are in favor of the switch to euro based

of millions in PAC funds. It may only effect 0.5% - 8% of GDP but it will
have a far greater effect on major oil. Have you noticed that whatever is
good for major oil seems to be what good for America.

This is not just about Dems vs Repubs. Since Clinton's Marc Rich pardon,
Clinton has also found a place on my shit list.

Oil and money, money and oil.

Genelt's a double edged sword. A stronger dollar makes imports cheaper for the
US and makes anything we export more expensive to other countries. The US
government right now would like nothing more than to see the yuan stronger
v. the dollar to do something to rectify the account deficit we have with
China. So it's not a one way deal.

Nobody can quantify what, if any, difference the 'petrodollar' makes in the
relative strength of the dollar. I can say this, when markets get scared
and capital 'flight to quality' starts nobody loads up on assets in Nigeria
and Bolivia. I think that's because, as screwed up as our economy is sometimes,
we're still by far the largest and most stable economy in the world. Here's
a fed chart for the dollar vs. G-10 currencies.

<http://minneapolisfed.org/Research/data/us/charts/exc1.cfm>

which shows the dollar losing over 20% of its value over four years. No food riots, no mass unemployment, nothing of the sort. Even if one assumes 10% of the value of the dollar is from being a reserve currency (which is absurdly high) that would put us back to being roughly where we were against G-10 currencies in 1997, which that chart uses as its 100 value.

>Remember, I agreed that all of the debt is bad. Whenever I hear republicans
complaining about how democrats tax everything too much I always think that's
preferable to running up trillions of dollars of debt. Which is what Bush
II has done masterfully.

In the 'good old days' the idea of national debt was that it was held by
the public. So in essence the government borrowed from it's own citizens.
That hasn't been true for a long time, and yes, there is always more risk
with foreign ownership of that debt. Right now it's in the interests of all
parties to keep the US afloat. I think that will be true for a very, very
long time, so I file 'China shows up and demands cash of California' in the
same risk folder as 'I get hit by meteor' and 'I bang Maria Sharapova.' But
yes, there is always some risk when so much national debt is held overseas,
but to me by far the greater problem is the debt itself, regardless of who
owns it.

And, by the way, whenever someone starts to tell you that the freemasons
or the trilateral commission or AIPAC really run the US government, keep
in mind that the house of Saud has close to a trillion of US treasuries they
keep here. That's just treasuries, not other investments and properties,
and so forth. I'd guess that gets some phone calls answered.

>I know the AP is just full of left wing media bias but...

<http://www.breitbart.com/news/2006/11/09/D8L9PBBG0.html>

Iraqi Official: 150,000 Civilians Dead

A stunning new death count emerged Thursday, as Iraq's health minister estimated at least 150,000 civilians have been killed in the war _ about three times previously accepted estimates.

Moderate Sunni Muslims, meanwhile, threatened to walk away from politics and pick up guns, while the Shiite-dominated government renewed pressure on the United States to unleash the Iraqi army and claimed it could crush violence in six months.

After Democrats swept to majorities in both houses of the U.S. Congress and Defense Secretary Donald H. Rumsfeld resigned, Iraqis appeared unsettled and seemed to sense the potential for an even bloodier conflict because future American policy is uncertain. As a result, positions hardened on both sides of the country's deepening sectarian divide.

Previous estimates of Iraq deaths held that 45,000-50,000 have been killed in the nearly 44-month-old conflict, according to partial figures from Iraqi

institutions and media reports.

No official count has ever been available, and Health Minister Ali al-Shemari did not detail how he arrived at the new estimate of 150,000, which he provided to reporters during a visit to the Austrian capital.

But later Thursday, Hassan Salem, of the Supreme Council for the Islamic Revolution in Iraq, or SCIRI, said the 150,000 figure included civilians, police and the bodies of people who were abducted, later found dead and collected at morgues run by the Health Ministry. SCIRI is Iraq's largest Shiite political organization and holds the largest number of seats in parliament.

In October, the British medical journal The Lancet published a controversial study contending nearly 655,000 Iraqis have died because of the war — a far higher death toll than other estimates. The study, which was dismissed by President Bush and other U.S. officials as not credible, was based on interviews of households and not a body count.

Al-Shemari disputed that figure Thursday.

"Since three and a half years, since the change of the Saddam regime, some people say we have 600,000 are killed. This is an exaggerated number. I think 150 is OK," he said.

Accurate figures on the number of people who have died in the Iraq conflict have long been the subject of debate. Police and hospitals often give widely conflicting figures of those killed in major bombings. In addition, death figures are reported through multiple channels by government agencies that function with varying efficiency.

As al-Shemari issued the startling new estimate, the head of the Baghdad central morgue said Thursday he was receiving as many as 60 violent death victims each day at his facility alone. Dr. Abdul-Razzaq al-Obaidi said those deaths did not include victims of violence whose bodies were taken to the city's many hospital morgues or those who were removed from attack scenes by relatives and quickly buried according to Muslim custom.

Al-Obaidi said the morgue had received 1,600 violent death victims in October, one of the bloodiest months of the conflict. U.S. forces suffered 105 deaths last month, the fourth highest monthly toll.

At least 45 Iraqis were killed or found dead in continuing sectarian violence Thursday, with 16 of the victims killed in bombings at Baghdad markets. For the fifth straight day, insurgent and militia mortar teams traded fire in the capital's northern neighborhoods.

Al-Shemari, while not explaining the death toll estimate, was more precise

about the government's increasingly public and insistent demands

quot;They should hand us the power. We are a sovereign country," he said, adding that the first step would be for American forces to leave population centers.

Al-Shemari is a controversial figure and a member of the movement of radical anti-American cleric Muqtada al-Sadr. Some U.S. officials have complained that the ministry has diverted supplies to al-Sadr's Mahdi Army militia.

In August, U.S. troops arrested seven of al-Shemari's personal guards in a raid on his office. The U.S. never explained the raid, but Iraqi officials said Americans suspected the guards were part of a militia.

Prime Minister Nouri al-Maliki, who also has close ties to al-Sadr, told Bush in a video conference last month that he would make renewal of the U.N. mandate under which the U.S. keeps forces in Iraq conditional on a rapid handover of power.

Al-Maliki also said at the time that U.S. forces should clear out of Iraq's cities, according to top aide Hassan al-Suneid. He said the White House agreed, although that was never confirmed in Washington.

urgents and
civilians after the February bombing of a Shiite shrine north of Baghdad.

The militias and their death squads are the armed wings of rival Shiite political parties. One of the militias, known as the Mahdi Army, is loyal to al-Sadr; the second, larger group is known as the Badr Brigade and answers to the SCIRI.

Al-Maliki's hold on power depends on the support of both political organizations and their fighters, hence his reluctance to move against the armed groups.

He also has balked at U.S. demands for passage of a series of laws that would favor minority Sunnis, a group that makes up the bulk of the

insurgency that has been fighting U.S. forces and has killed tens of thousands of Shiites.

Sunni members of parliament over the past two days have threatened to walk out of the legislature and take up arms. They charge the Shiite- dominated government with refusing to meet their demands for a fair division of power and natural resources.

The dean of the Sunni politicians in parliament said Thursday there were attempts by Iran to run Sunnis out of the country. Adnan al- Dulaimi then called Arab countries to support Iraq's Sunni minority.

"There is a Safawi (Iranian) plan to root the Sunnis out of this country, and we are confronting it," al-Dulaimi said. "We call on our Arab brethren to support us and confront this Safawi plan."

His political group has five ministers in al-Maliki's Cabinet and al-Dulaimi again threatened to pull them out of the government.

'I bang Maria Sharapova.'

thats greathmmm.

i guess it depends on the context in which you are using the voice master.

if you are looking for a good all around mic pre for electric guitars to bass to vocals to drums to everything... then i'd say you'd probably be happy with something else... as i wouldn't use the voice master for anything other than "pop"-ish vocals or acoustic guitars things you want bright anyway.

i wouldn't call the voice master a 'master' on vocals... but it certainly does a good job for being under 700 bucks. i think i paid 450-500 for my voice master about 6 years ago.

i also have a meek twinQcs... bought it around the same time... i only used it on females who already had a really focused (non-throaty) bright voice. and i used the meek for electric guitars... bass... and acoustic guitars that where going to be the main thing in the arrangement. i generally hated the meek for all other vocals... it was lifeless.

i would not call the voice master terrible in its price range... at least not what i paid for it.

Thad-

What would you say to this? I don't know who Mike Whitney is, but this seems worth considering.

-steve

<http://www.informationclearinghouse.info/article15440.htm>

The Dollar's Full-System Meltdown

By Mike Whitney

10/30/06 "Information Clearing House" -- -- The U.S. Dollar is kaput. Confidence in the currency is eroding by the day.

banks in China, Japan, Taiwan, South Korea, and Hong Kong have channeled

immense foreign reserves into American government bonds, helping to prop

Indeed, the strategy has changed. The world has come to its senses and is moving away from the green slip of paper that is currently mired in \$8.3 trillion of debt."

[. . .]

"According to the Wall Street Journal the Chinese Central-bank governor Zhou

presently have nearly \$1 trillion in USD and US Treasuries."Mike Whitney is, how you say in eenglish? Blithering eejjit. I think he's the source of a lot of this nonsense. He was pushing the Iranian oil exchange as the end of the world as we know it a while back. Look at the Mpls. fed chart. Our economy, and the world economy, have problems, but if we're going down it won't be because some people start buying oil using euros.

My AMD 4800+ dualcore is SaaaaaMoooooKiiin! Built it minutes ago.
Cubase 2.01 is in there begging for an upgrade. I might just do that
tomorrow too. Can that be done at a store or is it only online at =
Steiny?

The new Creamware Pro is supposed to be here on Mon or Tues.

I'll be in Chicago for a week on vacation. I want to stay home now.

I'll chime in too when it's up a running.

Tom

If you have a Guitar Center near you, they might have the
upgrade version in stock - that's where I got mine (v3), I think
Sweetwater also has it - check 'em out. ECMM, dunno... Morgan -
you out there?

Neil"zmora" <docent191@wp.pl> wrote:

Kewl, Z-man...will check it out.

Downloaded it - seems awful "big" for a simple tube driver...
is it CPU-intensive?

NeilSure, I hope you're wrong, too, DeeJ. Like me, you've been wrong before
so there's reason to hope. ;^)

The prediction that we will be attacked again has been made many times
before this election. And if/when we are attacked next it will probably
have been planned before this election.

But should it happen I'm sure a lot of cable TV blatherers will tell you
it's the fault of this election anyway. Flawed logic is still logic and
there's no goat like a scapegoat when the blatherers don't want to face
the possibility of other causes, like poorly considered policy and
action by whoever's not being scapegoated.

We've suffered al-Qaeda attacks under both Democratic and Republican
presidents. Worse under Republicans with 9/11, but go ahead and blame
BOTH the Clinton and Bush Jr. administrations, or if it really makes you
feel better, just blame Clinton and give Bush a pass.

Personally I can blame foreign policy back at least to WWI for
contributing to the setup of this situation. So IMO there's plenty of
blame to go around through many administrations in both major parties -
for those times we're in a blaming mood.

For those times when we can get BEYOND being in a blaming mood, the
assumption that one party or another is eager to invite attack is
presumptuous. Surely there are at least a few real patriots left in BOTH
major parties AND the minor parties.

There are different ways to attempt to meet any threat, diffuse the
threat and find solutions for any situation. Maybe, just maybe, we'll
get some further options on the table now to meet this threat, and
maybe, just maybe, they'll work better than the current approach which
has hardly been flawless.

Whatever we do, let's not allow ourselves to be manipulated by
terrorists into strutting around acting like overcompensating insecure
spendthrift fools while undercutting our own democracy with shifty eyed
abject fear - IOW, becoming terrorized. Fear sells, but maybe, just
maybe, we're better than that.

The best way to be strong is to come together, work together and choose from the widest array of effective options.

Cheers,
-Jamie

>Sorry for such an elementary post. I'm new to PARIS on an IBM machine, have always run Mac. There are so many free plugins including Chucks. I hear of wrappers, yet I read a post lately where a post said they had just created a vst folder and put the plugins there. Would you just place the DII file in the folder or what. I have a very simple setup a bundle III on a pentium III running XP on an 866mhz machine. I'm only about 2 steps above ignorant concerning IBMs so be gentle please ;^)any help will be appreciated.This is a multi-part message in MIME format.

Hey guys,

I am no match for DJ when it comes to this but I am pursuing a =
controllable version of a monster setup.

I have a master plan that is as simple as I can figure to pump Paris =
full of real-time processing juice. =20
Here it is.

Comp #1: Paris is running very well on a XP P4 3.0 and all the goodies. =
2 active

ADAT cards along with 32 A-D, D-As, two SPDIFS and a =
UAD-1 stocked for good measure.

Comp #2: Cubase Studio 4 on my new AMD 4800+ Dualcore with Creamware
14 chip Pro card with 20 In/out and Delta 66 w/4 x A-D, =
D-As and one SPDIF in/out,=20
FX-Teleport Host to comp below linked by 100mbps LAN.

Comp #3: Spare AMD 3000+ waiting for a FX-Teleport Client link to =
Cubase comp #2
via 100mbps LAN. This guy will take up the slack for =
the Cubase rig if need be.

My application is for heavy use of Kontakt, multiple softsynths and =
surely Creamware plugs of all sorts. =20
Music styles ranging from rock, heavy synth, orchestral and sometimes in =
between all of those.

My goal is to have solid/stable performance by not abusing any one =
computer in the network.
Also to maintain an almost unlimited amount of close to real-time =

processing power throughout.

I am looking into Windows Remote Desktop to help with monitor/keyboard = assignments.

I expect to have 4 monitors and two keyboard/mice combos with one KVM = between comp 1 & 2.

I'm about 2 monitors, a Matrox Triple Head 2 Go and Kontakt away before = I'm all the way there.

Anyone see anything blatantly wrong with my design? I'm still Scoping = it out!

Thanks for your input,

Tom=20

Deej,

It splits to 3840 x 1024. I use 1280x 1024 on each. Should work =
perfect for me.

This is how Brian used Paris screens with Macro Express. It's perfect =
for that.

If you keep Paris you have to use Macro Express. For \$40 you will be in =
heaven.

I'm still messing with Cubase but it's more forgiving in the graphics =
way. If I can't
find enough real estate on four monitors on any setting I'm a jerk.

You did get the Macro I sent you a month ago right?

Tom

Those are two of many choices. Black and white in a multi-colored world.

Concern and awareness are useful when focused to motivate planning and forethought that translates into appropriate action, no dispute from me on that. You can call that "healthy fear" if you like, at the risk of confusing it with unhealthy fear.

It's dangerously possible, through fear, to react with insufficient thought and understanding, and make a bad situation worse.

Ask a military planner. Fear is the path to panic, not the basis for

sound policy or strategy. Ask any dictator, fear is an effective way to enslave.

"...the only thing we have to fear is fear itself" FDR in another context.

At any rate, it would be inaccurate to imply that anyone who doesn't agree with a particular course of action is blind, deaf and dumb to potential threats. Not a true nor useful characterization. Divisive at best. And dividing ourselves IS one road to defeat.

It's important to recognize what hasn't worked, to be open to better ideas. So we can, together, find solutions that help our country and our planet achieve peace.

The first step toward getting out of a hole is to stop digging. That may be one message of this election.

Cheers,
-Jamie

> 24,2004. some serious competition for the post office here.VSTs that have an installer typically
want to install to C:\program
files\steinberg\vsts. Many here recommend putting all your vst dll
files in c:\vsts so you won't have a long path.

I would also recommend putting them in c:\vsts but when you do this any
installs (by running setup.exe or such) need to point them to c:\vsts.

Also, check c:\vsts after installs and if the setup.exe made
subdirectories you will need to move the dlls out of them to the c:\vsts
level so Paris can see them. Also make sure to tell Paris where c:\vsts
is in the Paris.cfg file.

of Chuck's plugins have a txt file with install
info that tells you how to install and were to put what. As for VSTs in
Paris, I have never run them, only DX, EDS and hopefully 'Pulsar via
external send' soon so I can't help ya there.

Good luck

>NeilRob, I don't know what other mic pres you have in your arsenal, but for something in the "under \$1k" price range, I've always thought it's real hard to beat the Grace 101... it's very neutral & clean, and paired with even a simple, inexpensive compressor like a dbx 166 or 266 - which have good sound quality for that price, IMO, I think you'd be better off than with a platinum series, none of which I've seen or heard anything really good written or spoken about. Yeah you won't

get the EQ on the combo I mentioned, but really, for so many things it's far from "required" to EQ it going to rack.

Just an idea for you to consider.

Also, if you can get into the "right around a grand" range, I recall a post a while back where Fletcher was raving about the EQ on this unit:

<http://www.mercenary.com/toaudeat.html>

I've never heard it myself, so I can't attest, but for \$1k you get two channels of mic pre, dynamics & EQ. I have a feeling that if Merc is selling it, there's a good chance it probably sounds better than the Platinum series. There's also this one:

<http://www.mercenary.com/toaudeecmomi.html>

Which appears to be a single-channel version, but I don't know if it's the same circuitry... you might call & ask. Finally, there's also this at a slightly higher price point than the 1-channel Toft unit:

<http://www.mercenary.com/spltronemoch.html>

SPL makes some good stuff.

>>Ask a military planner. Fear is the path to panic, not the basis for
sound policy or strategy. Ask any dictator, fear is an effective way to
enslave.<

Ask any military planner and he will tell you that without the weapons to do
the job he will not be able to do it.

"...the only thing we have to fear is fear itself" FDR in another context.

This was from Roosevelts first inagural and referred to an economic
depression. He was trying to keep people from withdrawing their money from
the banks. He certainly wasn't talking about a shooting war/spies and
sabatoeurs.

>At any rate, it would be inaccurate to imply that anyone who doesn't agree
>with a particular course of action is blind, deaf and dumb to potential
>threats. <

It would be inaccurate to imply that wars have not *always* required great
sacrifices from the citizenry of the respective combatants.

>Not a true nor useful characterization. Divisive at

best. And dividing ourselves IS one road to defeat.<

I agree 100%. It seems that half the folks in this country believe we are in a war, the other half don't. This is a sure recipe for disaster, especially in a war with an enemy who uses our own laws against us. To ignore this in an era where one person with a bomb can wipe out an entire city is a recipe for disaster on an unimaginable scale.

Hey guys,
I am no match for DJ when it comes to this but I am pursuing a =
controllable version of a monster setup.

I have a master plan that is as simple as I can figure to pump Paris =
full of real-time processing juice. =20
Here it is.

Comp #1: Paris is running very well on a XP P4 3.0 and all the =
goodies. 2 active
ADAT cards along with 32 A-D, D-As, two SPDIFS and a =
UAD-1 stocked for good measure.

Comp #2: Cubase Studio 4 on my new AMD 4800+ Dualcore with Creamware
14 chip Pro card with 20 In/out and Delta 66 w/4 x =
A-D, D-As and one SPDIF in/out,=20
FX-Teleport Host to comp below linked by 100mbps LAN.

Comp #3: Spare AMD 3000+ waiting for a FX-Teleport Client link to =
Cubase comp #2

via 100mbps LAN. This guy will take up the slack for =
the Cubase rig if need be.

My application is for heavy use of Kontakt, multiple softsynths and =
surely Creamware plugs of all sorts. =20
Music sty

les ranging from rock, heavy synth, orchestral and sometimes =
in between all of those.

My goal is to have solid/stable performance by not abusing any one =
computer in the network.

Also to maintain an almost unlimited amount of close to real-time =
processing power throughout.

I am looking into Windows Remote Desktop to help with monitor/keyboard =
assignments.

I expect to have 4 monitors and two keyboard/mice combos with one KVM =
between comp 1 & 2.

I'm about 2 monitors, a Matrox Triple Head 2 Go and Kontakt away =
before I'm all the way there.

Anyone see anything blatantly wrong with my design? I'm still Scoping =
it out!

Thanks for your input,
Tom=20

-----=_NextPart_000_0037_01C704AE.5B481620--Hey dudes,

We are having an event @ Georgetown Visitation school in Washington DC.
The live act just told us that we need to supply the PA. I'm looking for
someone who does rentals and can supply and setup the following:

1. ___8___ Channel Mixer w/xlr and 1/4" inputs
2. ___2___ Stage Monitors
4. ___1___ Wireless Handheld Microphones
5. ___3___ Microphone Boom Stands

total performance area sufficiently,

The venue is one half of the gymnasium (regulation size basketball)

Let me know if you know anyone in the DC area that can help with this. It
needs to be cheep too!

Thanks

Chuck
