I'm still a user. Rewiring everything now and debating on staying with Mac and seeing what develops, or switching to xp, but still amongst the faithful.

pabAaron,

Turns out Dimitrios says this is going to work so I'm picking up a Sync Plate and try it. Chris Ludwig says the quadcore this is going in is also going to be overclocked from 2.6- 3.2 . Oh boy!

Can't wait.

I spent about half the day today working on the Mac plugs. I have a friend who works for Ubuntu who is in Turkey right now. When he gets back, I'm going to ask him if he will help me with this. I'm completely stuck. I solved so many compile errors - hundreds and hundreds, but there is one I just have no

all you say is true. It all depends on what you mean by funk. Or rather "funk."

When I first read the subject line, the name that came to mind was Johnny  
Guitar Watson. That guy just oozed funk.

I'd also have to add anyone who James Brown hired. That's got to count for  
something.

If you twist the term "funk" far enough, you'd have to include Django, just  
for his sheer uniqueness. Well, maybe you wouldn't have to, but I might.

Just for sheer cussedness, I'd include Monk. Thelon
