WTF would you want to hang out with Vanessa Williams when you could go to LaChacha's Club Boom Boom with me?

I'm crushed!!!!"TCB" <nobody@ishere.com> wrote:

Yes, but what if he has been working on it all this time at his own pace?

Does the Mac Pro and OSX have a file size limit? I just tried
recording 48 tracks at 24/96 on HD but it cut out after 2 hours and
change with a 1.99GB track file size...

Just curiou

but super cool. Now I have the UAD SE emulation and this fabulous new DubStation (which I think might even be easy enough to use for live DJ/dubbing duties) to go with the PSP 84 and my various other delays. Pretty effin cool.

Also, the flanger is spectacular.

No wait! All this stuff sucks! Don't use it! Leave it for me!
