OK, end of crass self-promotion, back to "XTC is great." :) I have all their albums, including their Dukes of Stratosphear alter ego, and I don't think there's a bad record among 'em. Great writing, amazing guitar work,and Colin Moulding has to be one of the most creative bass players in the universe. Not nearly the fame and fortune they deserved.

"Even I never know where I go when my eyes are closed" - Andy Partridge from "Chalkhills and Children"

> Dimitrios Bitzenisl apologize in advance for slipping this shameless plug, but you mentioned
"Skylarking" and that reminded me of something. A local public radio DJ who
goes by "Equinox" wrote a review of my band Sarahtonin's first CD "Wayward."
Here's the quote I was reminded of:

"First of all, I am very impressed with it overall, the detail and care
which is obvious in every track on it. I can hear some influences
there---specifically it reminds me of the best XTC album they never made,
though there's a 'Skylarking' feel to some of it, especially 'Mile after
Mile'... "

Anyway, it was a very flattering review, though I don't think XTC were
influences and much as just musical birds of a feather who share a lot of
common influences -- Beatles, '60s psychedelia, and odd influences like
Beefheart and Zappa. I do think that anyone who likes XTC will like
Sarahtonin. (Available at CD Baby www.cdbaby.com/cd/sarahtonin) We also
sell it on our website www.sarahtonin.com but the shopping cart system is
temporarily down.

andy dandy CDex program to convert mp3's
to waves. Anyone know of a program that will do this??? My version of Wavelab
will only do mp3's and Cubase SX3 is the same. I just wasted a half hour
on idiottunes with no success. Any one know of something out there?????
Bueller.....anyone?????
RodWell....I've read both your posts and I don't really disagree with either
one of you in principle. However, I don't see any refutation at all or
addressing my of my points. Indecisiveness and division in time of war is a
disaster and, IMHO, is the reason this has dragged on for so long. It's more
like you don't believe the points are valid and this goes to the heart of
what I've been talking about all along. I guess we'll see. I hope I'm wrong
actually. I have no dog in the *being right(fight. I do have a big dog in
the fight that may come down to the disintegration of this nation and I know
I'm not going to change your mind about that nor you mine. As far as Gene's
historical analysis is concerned, I'm aware of the hist

>OK, that's understood then -- max latency not an issue. Cool. And I had an email exchange with the developer today regarding 98 -- he says it shouldn't be a problem and encouraged me to try the demo. Which I'll do, as soon as I'm done with this batch of mixes I'm busy with right now (don't want to throw *anything* new into this system until this job is done). But, if he gets this "manual latency" compensator gizmo working, I'll buy just for that and for the extra solo and mute capability.

-- thanks for keeping on top of these developments -- much appreciated
-- chas.
