-----=\_NextPart\_000\_0134\_01C814DA.670B77D0--The Bittree rear connector is really secure,  
and you can  
patch the connections at the rear of the unit around without  
pulling up punch down wires or desoldering.

The cool part is setting up normals:

<http://www.bittree.com/catalog/detail2.cfm?pageID=931>

We are dealers and I can get you a good price if you want one.

You will probably want the tool for crimping the rear connectors.  
I think it is about 100.00.

Cool DeeJ. I am looking forward to a seemingly tough match up.  
The Rockies beat us 2 out of 3 during the regular season.

I'd love to come visit. I've never been out that way before.

Watch my new thread for my findings with Paris.
