>Wow. Pretty strong accusations, assumptions and convenient speculation  
there James.

I'm not defending either MS or Apple, but I think it's quite narrow minded  
to make  
Apple out to be shining star of the corporate world just because you choose  
to believe that's the case.  
In fact, it's kind of sad you hold Apple in such high regard and think MS is  
basically the spawn of Satan.  
A little balance might be the wiser approach.

In my opinion, if an organization isn't dedicating 100% of it's resources to  
fighting hunger,  
helping the poor, or building homes for low income families (Habitat for  
Humanity), it's  
motivated by one thing - profit. Call it greed, call it business, it's all  
the same.  
Remember, it's just a company building a product to sell and make a  
profit...

Hope the Apple flavored kool-aid tastes good where you live.

I like those kind of questions !!

Well senderella can act as VST aux buss with 0 latency !

You load the "send" version on the tracks you need to send to aux DX effect and then use senderella as "return" on a stereo Paris audio tracks where the native effect is inserted !

More of that later...

Regards,

Dimitrios

senderella sends.

I guess the only bummer is that it can only be used before the  
Paris EQ's/faders.

Still pretty cool though.

Cheers

Kris
