needs a good home.

I can't guarantee the 10T drivers will work even though the interface should be fine - the 10T drivers were rather sketchy when I tried them.

I'll also send some beta drivers as well - you can always uninstall and reinstall the 4.10 drivers and be back up in no time. Make me an offer!

I know Dimitrios was interested and someone else as well, but as my laptop died recently, I lost all emails.
